Redeploying Urban Infrastructure Jonathan Rutherford, 2019-07-31 This book explores urban futures in the making as seen through the lens of urban infrastructure. The book describes how socio technical arrangements of energy and water provision are being recast in continuing efforts towards realising sustainable transformation of cities. It critically investigates how infrastructure comes to matter by analyzing the shifting capacities and entanglements of diverse actors with these systems, the various means they use to envision, enact and contest changes, and the wide ranging social and political implications of emerging infrastructure transitions. Drawing on original research into urban infrastructure debates and projects in Stockholm and Paris, the author develops a novel conceptual framework for studying and acknowledging the active vital role of infrastructure in constituting a material politics of urban transformation. Straddling the latest theoretical insights and empirical investigation of urban planning practice and socio technical engineering of systems and flows, Redeploying Urban Infrastructure forges new timely reflections and perspectives which will be of interest to the growing multidisciplinary community of scholars investigating infrastructure and to academics and practitioners with a concern for understanding the wider politics of urban futures.

Critical Perspectives on Cultural Memory and Heritage Veysel Apaydin, 2020-02-18 Critical Perspectives on Cultural Memory and Heritage focuses on the importance of memory and heritage for individual and group identity and for their sense of belonging. It aims to expose the motives and discourses related to the destruction of memory and heritage during times of war, terror, sectarian conflict and through capitalist policies. It is within these affected spheres of cultural heritage where groups and communities ascribe values, develop memories and shape their collective identity.

Technologies and Protocols for the Future of Internet Design: Reinventing the Web Prakash Vidyarthi, 2012-02-29 The Internet has changed significantly from its beginnings as a simple network used to pass data from one computer to another. Containing essential tools for everyday information processing, the Internet is used by small and large organizations alike and continues to evolve with the changing information technology landscape. Technologies and Protocols for the Future of Internet Design: Reinventing the Web aims to provide relevant methods and theories in the area of the Internet design. It is written for the research community and professionals who wish to improve their understanding of future Internet technologies and gain knowledge of new tools and techniques in future Internet design.

Practiceopolis: Stories from the Architectural Profession Yasser Megahed, 2020-07-30 This is a graphic novel about the contemporary architectural profession in which it acts as the protagonist in the form of an imaginary city called Practiceopolis. The novel narrates quasi realistic stories that exaggerate the architectural everyday and the tacit in order to make them prominent and tangible. They depict and dramatise the value conflicts between the different cultures of practising architecture and between the architectural profession and other members of the building industry as political conflicts around the future of Practiceopolis. The book uses the metaphorical world of Practiceopolis to provoke big questions about everyday routines in

the profession that practitioners may take for granted and to examine different ideologies at work among architects and other members of the construction industry The novel ends in the tradition of dystopian worlds common in a certain strand of graphic novels By vividly illustrating and narrating the critical issues he interrogates the author has created a world which any architect student or professional will both instantly recognise and simultaneously reject provoking the reader to challenge themselves and the profession at large

Future Cities Nick Dunn, Paul Cureton, 2020-12-10 What might our cities look like in ten twenty or fifty years How may future cities face global challenges Imagining the city of the future has long been an inspiration for many architects artists and designers This book examines how cities of the future have been visualised what these projects sought to communicate and what the implications may be for us now It provides a visual history of the future and explores the relationships between different visualisation techniques and ideologies for cities Thinking about what futures are who they are for why they are desirable and how and when they are to be brought into being is central to this book Through visualisation we are able to experiment in ways that would be impractical and potentially hazardous in the real world and this book therefore aims to contribute toward a better understanding of the power and agency of visualisations for future cities In this lavishly illustrated text the authors apply several critical lenses to consider the subject in different ways technological futures social futures and global futures providing a comprehensive survey and analysis of visions for future cities and engaging creatively with how we perceive tomorrow's world and future studies more widely

Design Investigations: After Abundance Thomas Geisler, Anab Jain, 2019-06-17 The speculative narrative AFTER ABUNDANCE imagines an Alpine society altered by climate change in which human ingenuity and solidarity are the keys to survival The work shows how local communities confront these new challenges with traditions and technologies using craft skills and resourcefulness so that they can continue to develop in their altered surroundings This encounter with experiments legal devices protests and performances invites readers to empathize with the lives of people in a possible future The Austrian contribution to the 2nd London Design Biennale also gives insight into the work of Studio Design Investigations under the direction of Anab Jain University of Applied Arts Vienna

Artificial Islands Owen Hatherley, 2022-08-09 Should Britain form a new union with its old Dominions in Canada Australia and New Zealand Are they really our closest allies and relations And is there any reason why they should want to unite again with us Great Britain has just left one Union after years of bitter argument and divisive

posturing But what if the island's future lies in another Union altogether with some of its former colonial kith and kin across the seas Why be in a Union with your immediate neighbours when you could instead be in a trans oceanic super state with our old friends in Canada Australia and New Zealand Welcome to the strange world of the CANZUK Union the name for a quixotic but apparently serious plan to reunify the white majority Dominions of the British Empire under the flag of low taxes strong borders and climate change denialism Artificial Islands tests the idea that Britain's natural allies and closest relations are in these three countries in North America and the Antipodes through a good look at the histories townscapes and spaces of several cities across the settler zones of the British Empire These are some of the most purely artificial and modern landscapes in the world British designed cities that were built with extreme rapidity in forcibly seized territories on the other side of the world from Britain Were these places really no more than just a reproduction of British Values planted in unlikely corners of the globe How are people in Auckland Melbourne Montreal Ottawa and Wellington re imagining their own history or their countries role in the British Empire and their complicity in its crimes And do they have any interest in a union with us

The Future of Learning Design Shirley Agostinho, Sue Bennett, Lori Lockyer, Barry Harper, 2013-09-13 Learning Design refers to research and development work that equips teachers with tools and strategies to aid their design thinking Its origin stems from two lines of inquiry i how to represent teaching practice from a technical perspective in the development and delivery of online learning environments and ii how to represent teaching practice in an appropriate form to enable teachers to share ideas about innovative online pedagogy and think about the process of design The underlying premise of learning design is that if effective teaching and learning practice can be represented in a systematic way thus supporting the process of reuse which could ultimately lead to improved practice A large international body of work has produced specifications of technical standards to support the delivery of online learning different learning design representations to disseminate best practice examples to support and encourage adaptation and software tools and strategies to support the design process This book presents a view of current thinking about learning design and provides insight into the future direction of this field of research and development It is a timely contribution that will stimulate discussion about these issues and guide and advance the learning design field This book was originally published as a special issue of Learning Media and Technology
