Online Methodological Issues Strategies Clinical Research:

Single Case Research Methodology Jennifer R. Ledford, David L. Gast, 2014-03-26 In this anticipated new edition of Single Case Research Methodology David L. Gast and Jennifer R. Ledford detail why and how to apply standard principles of single case research methodology to one's own research or professional project. Using numerous and varied examples, they demonstrate how single case research can be used for research in behavioral and school psychology, special education, speech and communication sciences, language and literacy, occupational therapy, and social work. This thoroughly updated new edition features two entirely new chapters on measurement systems and controversial issues in single subject research, in addition to sample data sheets, graphic displays, and detailed guidelines for conducting visual analysis of graphic data. This book will be an important resource to student researchers, practitioners, and university faculty who are interested in answering applied research questions and objectively evaluating educational and clinical practices. **Digital Games and**

Mental Health Rachel Kowert, Christopher J. Ferguson, Paul C. Fletcher, Doris Carmen Rusch, 2021-10-04 Practical and Ethical Dilemmas in Researching Sensitive Topics with Populations Considered Vulnerable Ana Patrícia Hilário, Fábio Rafael Augusto, 2020-11-06 This book seeks to support social science researchers who interact with vulnerability and/or sensitivity in the context of their research. Whilst there has been some important debate about the theoretical, methodological, and ethical issues of conducting research on sensitive topics and/or with vulnerable populations, the number of scholarly publications focused solely on these topics is limited and not up to date. The book intends to fill this gap by providing various research experiences as well as the elements that characterize them. The articles selected for this book intend first and foremost to stimulate reflexivity amongst the use of the concepts of sensitive topics and vulnerable groups and to provide tools that will allow researchers to improve their research practices. The book integrates several articles that explore a wide range of dilemmas that to a certain extent might allow the reader to access the backstage of this type of research. The reader will find here a rich and fruitful space for theoretical and empirical reflection where several social science researchers with different backgrounds share their experiences and research paths in a rigorous and creative way. *ECEL 2020 19th*

European Conference on e-Learning Prof. Dr.-Ing. Carsten Busc., Prof. Dr. Tilo Wendler, Martin Steinicke, 2020-10-29 **The Right Therapy for Neurological Disorders** E. Beghi, G. Logroscino, 2016-07-26 Most neurological disorders are chronic and aging related. With the increase of life expectancy, their incidence and prevalence will grow in the decades to come, which in turn will increase the load on medical and social systems worldwide. There is thus a desperate need for successful preventive and therapeutic measures based on randomized clinical trials (RCTs) conducted by independent organizations. This book provides a compendium relating most of the principles of reliable RCTs to specific neurological diseases. Contributed by specialized neurologists, the articles touch on important aspects of RCTs with a clear critical approach, highlighting their limitations as well as giving recommendations for their planning and conducting to address the variable genotypic and

phenotypic aspects of neurological conditions Consideration is also given to combining the clinical impact of the study results with patients values and the interests of pharmaceutical companies Neurologists involved in clinical trials will certainly benefit from this book which should become a basic text for all neurological courses dealing with evidence based neurology
