in Commercial Law Paul S Davies,Tan Cheng-Han SC,2022-09-08 This book is the first to examine intermediaries in a holistic and systematic manner The classical model of face to face contracting between two individuals is no longer dominant Instead deals frequently involve a number of parties often acting through intermediaries As a result it is important to understand the role and power of intermediaries Intermediaries tend to be considered within discrete silos of the law But by focussing upon a particular narrow area of law lessons are not learned from analogous situations This book takes a broader approach and looks across the traditional boundaries of private law in order to gain a proper assessment of the role played by intermediaries A wide range of jurisdictions and topical issues are discussed in order to illuminate the role intermediaries play in commercial law For example the continued growth of electronic commerce requires consideration of the role of websites and other platforms as intermediaries And developments in artificial intelligence raise the prospect of intermediaries being non human actors All these issues are subject to rigorous analysis by the expert contributors to this book **Essential Interviewing and Counseling Skills, Second Edition** Tracy Prout,Melanie Wadkins,Tatianna

Home Equity and Ageing Owners Lorna Fox O'Mahony,2012-01-06 The growing use of housing equity to support a range of activities and needs raises complex issues particularly for older owners In an environment in which older owners are pushed towards housing equity transactions to meet income and welfare costs they are required to make choices from a complex and sometimes bewildering range of options The transactions which facilitate the use of home

equity as a resource to spend in later life from trading down and ordinary secured and unsecured debt to targeted products including reverse lifetime mortgages home reversion plans and sale and rentback agreements raise important legal and regulatory issues This book provides a contextual analysis of the financial transactions that older people enter into using their housing equity It traces the protections afforded to older owners through the ordinary law of property and contract as well as the development of specific regulatory protections focused on targeted products The book employs the notion of risk to highlight the nature and causes of the situational vulnerabilities to which older people are now subject as consumers of housing equity showing that the older owner's personal situation is crucial in determining whether and why they may seek to release equity the options and products available to them and the impact of harms resulting from adverse transactions The book critically evaluates the extent to which this context is incorporated in the legal frameworks through which these transactions are governed as a measure of the appropriateness of existing legal provision as well as considering the arguments surrounding special protection for older owners in housing equity transactions Contract Law T.
