Transforming Socio-Natures in Turkey Onur İnal,Ethemcan Turhan,2019-07-09 This book is an exploration of the environmental makings and contested historical trajectories of environmental change in Turkey Despite the recent proliferation of studies on the political economy of environmental change and urban transformation until now there has not been a sufficiently complete treatment of Turkey s troubled environments which live on the edge both geographically between Europe and Middle East and politically between democracy and totalitarianism The contributors to *Transforming Socio Natures in Turkey* use the toolbox of environmental humanities to explore the main political cultural and historical factors relating to the country s socio environmental problems This leads not only to a better grounding of some of the historical and contemporary debates on the environment in Turkey but also a deeper understanding of the multiplicity of framings around more than human interactions in the country in a time of authoritarian populism This book will be of interest not only to students of Turkey from a variety of social science and humanities disciplines but also contribute to the larger debates on environmental change and developmentalism in the context of a global populist turn

The New Lives of Images Adrian J. Ivakhiv,2025-09-30 In this ambitious new work eco philosopher and cultural theorist Adrian Ivakhiv presents an incisive new way of thinking about images and imagination Drawing upon an immense range of materials Ivakhiv reassesses the place of imagination in cultural life analyzing how people have interacted with images in the past and the ways that digital media are profoundly altering these relationships today The book contributes powerfully to the study of visual culture and digital media and provides provocative interpretations of a range of important artists and media movements from the work of photographer Edward Burtynsky the ambitious multi screen installations of John Akomfrah the abstract art of Swedish spiritualist Hilma af Klint and the

Afrofuturism of jazz musicians like Sun Ra and poet Alexis Pauline Gumbs to the ever expanding universe of animal videos on YouTube Along the way the book delves into animacy and religious imagery iconophilia and iconoclasm divination and prophecy truthiness and enchantment networks online communities and artificial intelligence the political and affective economies of digital media and the role of utopian futurism in the present climate colonial Anthropocene predicament The result is a vital contribution toward a more empowering conception of the creative imagination and its possibilities in today's emerging digital ecology

Fiction in the Quantum Universe Susan Strehle, 2000-11-09 In this outstanding book Susan Strehle argues that a new fiction has developed from the influence of modern physics She calls this new fiction actualism and within that framework she offers a critical analysis of major novels by Thomas Pynchon Robert Coover William Gaddis John Barth Margaret Atwood and Donald Barthelme According to Strehle the actualists balance attention to questions of art with an engaged meditation on the external actual world While these actualist novels diverge markedly from realistic practice Strehle claims that they do so in order to reflect more acutely what we now understand as real Reality is no longer realistic in the new physical or quantum universe reality is discontinuous energetic relative statistical subjectively seen and uncertainly known all terms taken from new physics Actualist fiction is characterized by incompletions indeterminacy and open endings unsatisfying to the readerly wish for fulfilled promises and completed patterns Gravity's Rainbow for example ends not with a period but with a dash Strehle argues that such innovations in narrative reflect on twentieth century history politics science and discourse

The One Story John W. Simpson, 2025-01-23 Our creation and redemption by God and our discipleship to Jesus are all one story and it is an odd story It is odd because the method God follows in all his actions toward us and which we imitate in discipleship to Jesus is characterized not by triumph even paradoxical triumph or by assertion of a hero's individuality and strength but by weakness submission self enslavement and loss God has followed this method in creating a universe to stand alongside and even challenge God's existence God has also acted in this way in continuing to nurture the existence of the human rebels against God So God has also acted in the incarnation in that is the kenosis of Christ his self emptying Philippians 2:7 which provides us the sharpest delineation of the divine method And so God has acted for our redemption and our creation as a people conformed to Jesus and giving testimony to the defeat by his kenosis of the powers that have enslaved humanity The One Story fills out the progress of this one story of creation and redemption and speaks a challenge to how the church understands and lives out the victory by kenosis of Jesus

Nationhood, Providence, and Witness Carys Moseley, 2013-11-28 In this eloquently argued work Carys Moseley provides an original angle of criticism on the issue of nationhood and Christianity asserting that Christianity must relate to nationhood as the nation structure is part of God's plan

for humanity The book addresses three major themes in the field of theology and nationhood The first is that anti nationalism and anti Zionism are often two sides of the same coin and involve taking leave of a providential reading of the Bible as well as a willingness to understand history in broadly providential terms The second is that such an approach tends to involve a reluctance to recognise subordinated Gentile nations especially those that have lost independence Moseley studies the work of four theologians Reinhold Niebuhr Rowan Williams John Milbank and Karl Barth to examine the difference between nationhood and statehood She provides a perspective on Wales as a stateless nation as an example of a Gentile parallel to Israel Thirdly Moseley links social theorists to the theologians to explore their affinities Niebuhr is paired with Mark Juergensmeyer and Rowan Williams is juxtaposed to the debate between Adrian Hastings and Anthon Smith Nationhood Recognition and Providence will interest anyone concerned with nationhood and Israel in protestant theology and offers unique insights into stateless nations from the Welsh born author s perspective

Adaptations in the Sound Era Deborah Cartmell,2015-07-30

There is no disputing that the coming of sound heralded a new era for adaptations We take it for granted today that a film is enhanced by sound but it was not a view unanimously held in the early period of sound cinema While there was a substantial degree of skepticism in the late 1920s and early 30s about the advantages of sound what we would call technophobia today the inclusion of speech in screen versions of literary and theatrical works undeniably revised what it was to be an adaptation words Focusing on promotional materials Adaptations in the Sound Era tracks early attempts to promote sound through the elevation of words in adaptations in the early sound period The popular appeal of these films clearly stands in opposition to academic regard for them and the book reflects on the presence and marketing of words in a variety of adaptations from the introduction of sound in the late 1920s to the mid 1930s This book contextualizes a range of adaptations in relation to debates about picturizations of books in the early sound era including reactions to the talking adaptation by writers such as Irwin Panofsky Aldous Huxley and Graham Greene Film adaptations of Shakespeare Dickens gothic fiction and biopics are also discussed in relation to their use and promotion of sound or more precisely words

Jon Bialecki,2022-03-01 The Mormon faith may seem so different from aspirations to transcend the human through technological means that it is hard to imagine how these two concerns could even exist alongside one another let alone serve together as the joint impetus for a social movement Machines for Making Gods investigates the tensions between science and religion through which an imaginative group of young Mormons and ex Mormons have found new ways of understanding the world The Mormon Transhumanist Association MTA believes that God intended humanity to achieve Mormonism s promise of theosis through imminent technological advances Drawing on a nineteenth century Mormon tradition of religious speculation to reimagine Mormon eschatological hopes as near future technological possibilities they envision such current and possible advances as cryonic preservation computer simulation and quantum archeology as paving the way for the resurrection of the dead the creation of worlds without end and promise of undergoing theosis of becoming a god Addressing the role of speculation in the anthropology of religion Machines for Making Gods undoes debates about secular transhumanism s relation to religion by highlighting the differences an explicitly religious transhumanism makes Charting the conflicts and resonances between secular transhumanism and Mormonism Bialecki shows how religious speculation has opened up

imaginative horizons to give birth to new forms of Mormonism including a particular progressive branch of the faith and even such formations as queer polygamy The book also reveals how the MTA s speculative account of God and technology together has helped to forestall some of the social pressure that comes with apostasy in much of the Mormon Intermountain West A fascinating ethnography of a group with much to say about crucial junctures of modern culture Machines for Making Gods illustrates how the scientific imagination can be better understood when viewed through anthropological accounts of myth
