Frank,2017-06-14 This study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism Whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists In the process the discursive boundary between the factual and the speculative can become difficult to discern To elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur As turn of the century writers such as Stevenson and Conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine nature of both terrorist and counter terrorist operations Supported by contextual readings of selected texts and films from *The Dynamiter* and *The Secret Agent* through late Victorian science fiction to post 9 11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy Drawing on research from a variety of disciplines *The Cultural Imaginary of Terrorism* will be a valuable resource for those with interests in the areas of Literature and Film Terrorism Studies Peace and Conflict Studies Trauma Studies and Cultural Studies      **Deutschland**

*Inglourious Basterds*      **The Space of the World** Nick Couldry,2024-09-17 Over the past thirty years humanity has made a huge mistake We handed over to big tech decisions that have allowed them to build what has become our space of the world the highly artificial space of social media platforms where much of our social life now unfolds This has proved reckless and has huge social consequences The toxic effects on social life young people s mental health and political solidarity are well known but the key factor underlying all this has been missed the fact that humanity allowed business to construct our space of the world at all and then exploit it for profit In the process we ignored two millennia of political thought about the conditions under which a healthy or even a non violent politics is possible We endangered the one resource that is in

desperately short supply in the face of catastrophic climate change solidarity Is human solidarity possible in a world of continuous digital connection and commercially managed platforms and what if it isn't In the first book of his trilogy Humanising the Future Nick Couldry offers a radical new vision of how to design our digital spaces so that they build rather than erode both solidarity and community This trenchant and vividly written book stresses that we cannot afford not to care for our space of the world We need to rebuild it together
