One Thousand Ways to Make \$1000 Frances Mary Cowan Minaker,1936 **One Thousand Ways to Make Money**
Page Fox,2020-07-06 The object of this work is to help people who are out of employment to secure a situation to enable persons of small means to engage in business and become their own employers to give men and women in various lines of enterprise ideas whereby they may succeed and to suggest new roads to fortune by the employment of capital The author has been moved to the undertaking by the reflection that there exists nowhere a book of similar character There have indeed been published a multitude of books which profess to tell men how to succeed but they all consist of merely professional counsel expressed in general terms We are told that the secrets of success are industry and accuracy the grasping of every opportunity being wide awake getting up early and sitting up late and other cheap sayings quite as well known to the taker as to the giver Even men who have made their mark when they come to treat of their career in writing seem unable to give any concrete suggestions which will prove helpful to other struggling thousands but simply tell us they won by hard work or by close attention to business The author of this book has gone to work on a totally different plan I have patiently collected the facts in the rise of men to wealth and power have collated the instances and instruments of fortune and from these have sifted out the real secrets of success When as in a few cases the worn out proverbs and principles are quoted these are immediately reinforced by individual examples of persons who attributed their advancement to the following of these rules but in general the suggestions are new and in very many cases plans and lines of work are proposed by the author which are entirely original and so far as he knows absolutely untried Hence the work becomes of incomparable value to business men who are constantly seeking new means to interest the public and to dispose of their goods Of course the vast field of action treated of in this work lies beyond the experience of any one man but the author has talked with business men in every walk in life and gleaned from them the essential facts in their career in many instances these facts are not the things they have done but the things they would do if they could begin again thus giving the reader the benefit both of their success and failure As a book offering opportunities to the ambitious presenting openings to those seeking a wider scope for their faculties affording stimulation to persons of sluggish blood and giving away trade and business secrets never before divulged the author feels confident that the little work stands unrivaled and as such he modestly offers it to the public for its approval

The Leader's Bookshelf Martin Cohen, 2020-10-09 Which books inspired some of the world s most successful people and why Come on a journey of literary exploration and find out how books can impact your life It turns out that the life stories of many famous people start out with a particular book that inspired them when young Here Martin Cohen explores the lives of some remarkable people inventors scientists business gurus and political leaders and the books that have challenged inspired and influenced them And so exploring the ideas dreams and inspirations that this diverse group shared is at the heart of this book too Inspiration in particular is the thread that ties together individuals with characters and backgrounds as diverse as Jane Goodall and Barack Obama Malcolm X and Judge Clarence Thomas Oprah Winfrey and Malala Yousafzai Rachel Carson and Frans Lanting Often behind many tales of achievement lies much more than a collection of smart tactics There are beliefs and values that guide many a grand strategy too And the strategies are often very different which if you think about it shouldn t come as a surprise If there really were just one recipe for success well everyone would be using it already No the thing that unifies these disparate approaches is that they all provided for their owners a kind of conceptual grid onto which a wide range of day to day creative scientific or business practices are able to develop and grow For Sergey Brin and Larry Page the founders of Google for example the grid was Charles Darwin s notions of natural mutation and iteration With Henry Ford the man who pioneered the method of the assembly line the grid was an obscure ethereal theory of life as a sequence of reincarnations And for both Oprah Winfrey and Steve Jobs the grid was existentialist ideas about the pursuit of authenticity In all these cases a grand indeed often philosophical theory meshed perfectly with a practical business strategy All of these remarkable people and the books that most inspired them are explored in this book
