Handbook of Research on Transforming Teachers' Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25 The COVID 19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety As schools emptied remote learning rapidly expanded through online services and video chatrooms Unfortunately this disrupted many students and teachers who were not accustomed to remote classrooms This challenge has forced K 12 teachers to think differently about teaching Unexpectedly and with little time to prepare they have been confronted with redesigning their curriculum and instruction from face to face to online virtual classrooms to protect students from the COVID 19 virus while ensuring that these new online initiatives remain sustainable and useful in the post pandemic world As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction their instruction both in online and face to face will impact what and how students learn in the 21st century The Handbook of Research on Transforming Teachers Online Pedagogical Reasoning for Engaging K 12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K 12 virtual learning The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world The following chapters present instructional strategies for multiple grade levels and content areas best practices that work clearly describing why they work and the teachers pedagogical reasoning that supports online implementations The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face to face and virtual environments as an essential design component Covering such topics as K 12 classrooms pedagogical reasoning and virtual learning this text is perfect for professors teachers students educational designers and developers instructional technology faculty distance learning faculty and researchers interested in the subject

America's Jails Derek Jeffreys, 2018-06-05 A look at the contemporary crisis in U S jails with recommendations for improving and protecting the dignity of inmates Twelve million Americans go through the U S jail system on an annual basis Jails which differ significantly from prisons are designed to house inmates for short amounts of time and are often occupied by large populations of legally innocent people waiting for a trial Jails often have deplorable sanitary conditions and there are countless records of inmates being brutalized by staff and other inmates while in custody Local municipalities use jails to institutionalize those whom they perceive to be a threat so hundreds of thousands of inmates suffer from mental illness People abandoned by families or lacking health insurance or those who cannot afford bail often cycle in and out of jails In America's Jails Derek Jeffreys draws on sociology philosophy history and his personal experience volunteering in jails and prisons to provide an understanding of the jail experience from the inmates perspective focusing on the stigma that

surrounds incarceration Using his research at Cook County Jail the nation s largest single site jail Jeffreys attests that jail inmates possess an inherent dignity that should govern how we treat them Ultimately fundamental changes in the U S jail system are necessary and America s Jails provides specific policy recommendations for changing its poor conditions Highlighting the experiences of inmates themselves America s Jails aims to shift public perception and understanding of jail inmates to center their inherent dignity and help eliminate the stigma attached to their incarceration

California and the Politics of Disability, 1850-1970 Eileen V. Wallis, 2023-03-31 This book explores the political legal medical and social battles that led to the widespread institutionalization of Californians with disabilities from the gold rush to the 1970s By the early twentieth century most American states had specialized facilities dedicated to both the care and the control of individuals with disabilities Institutions reflect the lived historical experience of many Americans with disabilities in this era Yet we know relatively little about how such state institutions fit into specific regional state or local contexts west of the Mississippi River how those contexts shaped how institutions evolved over time or how regional institutions fit into the USA s contentious history of care and control of Americans with mental and developmental disabilities This book examines how medical social and political arguments that individuals with disabilities needed to be institutionalized became enshrined in state law in California through the creation of a bureaucracy of disability Using Los Angeles County as a case study the book also considers how the friction between state and county policy in turn influenced the treatment of individuals within such facilities Furthermore the book tracks how the mission and methods of such institutions evolved over time culminating in the 1960s with the birth of the disability rights movement and the complete rewriting of California s laws on the treatment and rights of Californians with disabilities This book is a must read for those interested in the history of California and the American West and for anyone interested in how the intersections of disability politics and activism shaped our historical understanding of life for Americans with disabilities

Our Punitive Society Randall G. Sheldon, Morghan Vélez Young, 2020-12-10 This reader friendly exploration of the primary forces relevant to punishment poverty and political powerlessness highlights the necessity for humane alternatives to our current incarceration binge This provocative overview looks at the business of punishment and at the historical patterns of control regarding slavery the death penalty women the LGBTQ community juveniles and supervision The United States has the world s highest rate of incarceration a form of punishment that separates the least privileged from the rest of society creating populations of damaged lives All of society pays the price for overly punitive sanctions Equal justice is not possible in an unequal society Up to date statistics illustrate the race class and gender inequalities in the criminal justice system The criminal justice system has expanded for half a century Will challenges to policing succeed in narrowing the net of social control Will the cost of maintaining a massive system stimulate a transformation or will stakeholders support minimal reforms that do not threaten their interests The public is largely unaware of most of the workings of the criminal justice system Through this engaging text the authors hope

to provide insights that encourage readers to examine the collateral effects of policies to address crime and the role of punishment

Controlling the Dangerous Classes Randall G. Sheldon, Pavel V. Vasiliev, 2017-12-19 Throughout history the powerful have created laws developed agencies to enforce those laws and established institutions to punish lawbreakers Maintaining the social order to their advantage resulted in the systematic repression of disadvantaged groups the dangerous classes The third edition retains a historical approach to exploring patterns of social control and through current examples demonstrates how those strategies continue today The authors trace the roots of race class and gender bias in how laws are written interpreted and applied The management of dangerous classes is not a recent phenomenon there is a long history of keeping those who derive the least advantage from the status quo and therefore pose the greatest threat under control There was and is one system of justice for the privileged and a very different system for the less privileged The criminal justice system from the law to daily operations of the police courts and corrections generally comes down hardest on those with the least amount of power and influence and is the most lenient with those with the most power and influence The book raises critical questions What is a crime What is law Whose interests are served by the law and the criminal justice system What patterns are repeated generation after generation How does the criminal justice system relate to larger issues such as social inequality social class race and gender Contemplation of these topics contributes to informed public dialogue and careful deliberation about the present state and the future of criminal justice
