**The Future of the Professions** Richard Susskind,Daniel Susskind,2022-03-31 This book predicts the decline of today s professions and introduces the people and systems that will replace them In an internet enhanced society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction The authors challenge the grand bargain the arrangement that grants various monopolies to today s professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks

**Leading the eLearning Transformation of Higher Education** Gary E. Miller,Kathleen S. Ives,2023-07-03 Published in Association with eLearning has entered the mainstream of higher education as an agent of strategic change This transformation requires eLearning leaders to develop the skills to innovate successfully at a time of heightened competition and rapid technological change In this environment eLearning leaders must act within their institutions as much more than technology managers and assume the prime role of helping their institutions understand the opportunities that eLearning presents for faculty for students and for client organizations in the community They need to prepare to participate in policy development around these opportunities They must understand the multiple dimensions of practice in the field operations administration and working within the complex

culture of a higher education institution while also functioning as scholars of the field who can bring the best ideas from other institutions to help shape policy around eLearning The second edition builds on the success of the first edition and presents both the collective expertise of veterans who have pioneered the field for 20 years and of a rising generation of eLearning leaders that are transforming online programs at their own institutions to address these challenges This edition has been updated and expanded to reflect the increasing complexity of the field with seven new chapters and the revision of eight chapters that appeared in the first edition New and updated topics include The evolving role of the chief online learning officer Issues of diversity as more women and minorities enter leadership roles in the field The increasing role of learning analytics and data based decisions The potential tensions involved in cohort based versus individualized instruction The increasing need for faculty professional development The affordances of cloud computing adaptive learning artificial intelligence the internet of things and mobile learning to the field The open educational resources movement and the implications for institutional policy and practice The challenges of an increasingly complex competitive environment Accessibility There are few comparable positions in higher education than that of eLearning leaders who work across multiple academic and support units and whose work fundamentally affects the institution as a whole This volume is written for them

**Changing Face of Information: Support Services for Scientific Research** David J. Brown, 2020-01-20 The health of scientific enterprise has become a critical political and social issue as nation states tackle austerity diversity global challenges whilst simultaneously supporting a competitive and innovative national economy A key asset in achieving such ambitions is for a scholarly information system which enables the fruits of the research effort to be disseminated efficiently As the information support system struggles with adapting from a print based to a digital process the dysfunctionality current within STEM publishing in particular becomes evident New ways of supporting research are emerging which require a new approach to publishing an approach which takes on board the many demographic social technical and administrative changes taking place in both science itself and society A radical strategic assessment is required and this book tracks key aspects required for any new future strategy This book provides a catalogue of issues to which a future STEM information industry will need to adapt They range from the effects of technology on the neurological processes of research to the growing use of technology to speed up the exchange of information among groups and collaboratories from considerations about quality control yet maintaining intellectual ownership from changing from an elitist STEM system favouring academics to a more democratic process with wider appeal There is the neglected non academic market and its need to share in the results of the research effort often through partnership and being part of a hive mind This is the large world of the unaffiliated knowledge workers of which academia is numerically but a small part The many changes taking place in scholarly information dictate that the future is unlikely to be a smooth and gradual evolution from the past Radical new approaches are required a revolution which takes on board the perfect storm of changes listed in this book Just as such changes have changed the face

of industries such as music and retail in recent years so similar dramatic changes are likely to result in a restructuring of STEM into a more technologically focused industry within the next decade The implications for the current STEM stakeholders are profound

**Computers and Society** Ronald M. Baecker, 2019-04-24 The last century has seen enormous leaps in the development of digital technologies and most aspects of modern life have changed significantly with their widespread availability and use Technology at various scales supercomputers corporate networks desktop and laptop computers the internet tablets mobile phones and processors that are hidden in everyday devices and are so small you can barely see them with the naked eye all pervade our world in a major way Computers and Society Modern Perspectives is a wide ranging and comprehensive textbook that critically assesses the global technical achievements in digital technologies and how they are applied in media education and learning medicine and health free speech democracy and government and war and peace Ronald M Baecker reviews critical ethical issues raised by computers such as digital inclusion security safety privacy automation and work and discusses social political and ethical controversies and choices now faced by society Particular attention is paid to new and exciting developments in artificial intelligence and machine learning and the issues that have arisen from our complex relationship with AI

**The Fourth Education Revolution Reconsidered** Anthony Seldon, Oladimeji Abidoye, Timothy Metcalf, 2020-10-05 This book presented in considerably updated and extended second edition is a call to educators everywhere to open their eyes to what is coming If we do so then the future will be shaped by us for the common interests of humanity but if we don't then it will be imposed and we will all lose

**Making Sense of Expertise** Reiner Grundmann, 2022-10-24 Current debates about experts are often polarized and based on mistaken assumptions with expertise either defended or denigrated Making Sense of Expertise instead proposes a conceptual framework for the study of expertise in order to facilitate a more nuanced understanding of the role of expertise in contemporary society Too often different meanings of experts and expertise are implied without making them explicit Grundmann's approach to expertise is based on a synthesis of approaches that exist in various fields of knowledge The book aims at dispelling much of the confusion by offering a comprehensive and rigorous framework for the study of expertise A series of in depth case studies drawn from contemporary issues including the climate crisis and the COVID 19 pandemic provide the empirical basis of the author's comprehensive approach This thought provoking book will be of great interests to students instructors and researchers in a range of fields in the humanities social sciences and science and technology studies

The Culture of AI Anthony Elliott, 2019-01-15 In this ground breaking book Cambridge trained sociologist Anthony Elliott argues that much of what passes for conventional wisdom about artificial intelligence is either ill considered or plain wrong The reason The AI revolution is not so much about cyborgs and super robots in the future but rather massive changes in the here and now of everyday life In The Culture of AI Elliott explores how intelligent machines advanced robotics accelerating automation big data and the Internet of Everything impact upon day to day life and contemporary societies With remarkable

clarity and insight Elliott's examination of the reordering of everyday life highlights the centrality of AI to everything we do from receiving Amazon recommendations to requesting Uber and from getting information from virtual personal assistants to talking with chatbots The rise of intelligent machines transforms the global economy and threatens jobs but equally there are other major challenges to contemporary societies although these challenges are unfolding in complex and uneven ways across the globe The Culture of AI explores technological innovations from industrial robots to softbots and from self-driving cars to military drones and along the way provides detailed treatments of The history of AI and the advent of the digital universe automated technology jobs and employment the self and private life in times of accelerating machine intelligence AI and new forms of social interaction automated vehicles and new warfare and the future of AI Written by one of the world's foremost social theorists The Culture of AI is a major contribution to the field and a provocative reflection on one of the most urgent issues of our time It will be essential reading to those working in a wide variety of disciplines including sociology science and technology studies politics and cultural studies
