Human Rights and Social Justice Joseph Wronka,2016-06-29 Offering a unique perspective that views human rights as the foundation of social justice Joseph Wronka s groundbreaking Human Rights and Social Justice outlines human rights and social justice concerns as a powerful conceptual framework for policy and practice interventions for the helping and health professions This highly accessible interdisciplinary text urges the creation of a human rights culture as a lived awareness of human rights principles including human dignity nondiscrimination civil and political rights economic social and cultural rights and solidarity rights The Second Edition includes numerous social action activities and questions for discussion to help scholars activists and practitioners promote a human rights culture and the overall well being of populations across the globe

World Heritage Management and Human Rights Stener Ekern,William Logan,Birgitte Sauge,Amund Sinding-Larsen,2016-03-22 This book focuses on the balance between protecting human rights and protecting world heritage sites It concerns itself with the idea that the management of heritage properties worldwide may fail to adequately respect traditional entitlements and rights of individuals and communities living within or being affected by changes in the use of these spaces It also explores the concept that the international heritage field has limited knowledge and awareness of this challenge The volume argues that the dilemmas in question result from different conceptualisations of the key terms of rights heritage and community among different groups and across political and cultural boundaries In so far as culture is what enables us to read the meanings involved the ultimate questions are those that ask whose power is contested when one meaning is fixed and the heritage of one group of humans is given the right to have its symbolic representation enjoyed and protected The included case studies give vivid examples of this This book was originally published as a special issue of the International Journal of Heritage Studies

Formation in Language and Computation **The Right to Housing** Jessie Hohmann, 2013-03-01 A human right to housing represents the law's most direct and overt protection of housing and home. Unlike other human rights through which the home incidentally receives protection and attention, the right to housing raises housing itself to the position of primary importance. However, the meaning, content, scope, and even existence of a right to housing raise vexed questions. Drawing on insights from disciplines including law, anthropology, political theory, philosophy, and geography, this book is both a contribution to the state of knowledge on the right to housing and an entry into the broader human rights debate. It addresses profound questions on the role of human rights in belonging and citizenship, the formation of identity, the perpetuation of forms of social organisation, and ultimately of the relationship between the individual and the state. The book addresses the legal, theoretical, and conceptual issues, providing a deep analysis of the right to housing within and beyond human rights law. Structured in three parts, the book outlines the right to housing in international law and in key national legal systems, examines the most important concepts of housing, space, privacy, and identity, and finally looks at the potential of the right to alleviate human misery, marginalisation, and deprivation. The book represents a major contribution to the scholarship on an under-studied and ill-defined right. In terms of content, it provides a much-needed exploration of the right to housing. In approach, it offers a new framework for argument within which the right to housing as well as other under-theorised and contested rights can be reconsidered, reconnecting human rights with the social conditions of their violation and hence with the reasons for their existence. Shortlisted for The Peter Birks Prize for Outstanding Legal Scholarship 2013.

NGO's and the Universal Declaration of Human Rights W. Korey, 2001-02-02 When the Universal Declaration of Human Rights was adopted 50 years ago, Eleanor Roosevelt, its principal architect, predicted that a curious grapevine would carry its message behind barbed wire and stone walls. This book tells the extraordinary story of how NGOs became the grapevine she anticipated, sharpening our awareness about the violations of human rights, shaming its most notorious abusers, and creating the international mechanisms to bring about implementation of the Declaration. Korey traces how NGOs laid the groundwork for the destruction of the Soviet empire as well as of the apartheid system in South Africa and established the principle of accountability for crimes against humanity. The notion of human rights has progressed from being a marginal part of international relations a half century ago to stand today as a critical element in diplomatic discourse, and this book shows that it is the NGOs that have placed human rights at the centre of humankind's present and future agenda. *The Handbook of Conflict Resolution* Morton Deutsch, Peter T. Ambrose, 1995-08-24 Development was achieved in the West by capitalism and industrialization before liberal democracy was introduced as a viable form of government Africa is grappling with the problems of underdevelopment Yet the West insists on liberal democracy for Africa a form of government which has no economic and social foundations in Africa The West now faults the African people for not being able to establish and sustain democratic institutions Ambrose an African development practitioner who recently returning from the continent after three intense years of fact finding research and consultation argues that the solution to Africa s problems does not lie in externally imposed liberal institutions shored up by top down bureaucracy that most often is ignorant unresponsive or outright hostile to the needs of the impoverished majority Her investigations lead her to believe that the solution for Africa lies in a collective approach based on empowerment of the masses and economic reforms **Privatizing the Democratic Peace** H.
