Van Tassell,2025-06-02 The dynamic nature of storytelling has long been one of the major concerns of narrative research but
relatively little scholarship has engaged with the relationship between storytelling dynamics and the underlying material
forms of cultural texts This volume seeks to remedy this by asking questions such as How might the affordances of new
media guide audience reception in subtle ways How might the dynamism of legacy media be better recognized when

examined through a multimedial lens How do the physical processes of production define the horizons of both authorial activity and audience response The insight that drives these investigations is two fold first that functions and effects of narratives are deeply intertwined with material forces of production distribution and reception and second that an analysis of any specific narrative must include attention to these material matters and how they affect the unfolding of stories over time The chapters in this collection explore interplays between material forces and narrative dynamics across a range of genres and intellectual arenas In doing so they both fill gaps in current methodological frameworks and call attention to the many gaps that are yet to be filled **Statement** ,2012 *Remote Work-From-Home Jobs* Cassi Hargroder,2021-07-25 In recent years there has been a surge of interest in jobs where you can work from home not just from individuals but from employers who are realizing there are benefits to creating roles that allow employees to work offsite Learn how you can work from home at a job you enjoy have more free time earn more money have less stress and be happier You ll even learn how to work remotely on your current job
