SoLoMo - Always-on im Handel Gerrit Heinemann, 2013-12-23 Das Shopping der Zukunft zeichnet sich durch ein begleitendes Zusammenspiel von sozialer Vernetzung, Lokalisierung und mobiler Internetnutzung beim Ladenbesuch aus. Dieser Dreiklang bildet die Basis für die Synergien des SoLoMo, die ganz neue Möglichkeiten der Vermarktungseffizienz insbesondere für stationäre Händler erlauben. Die sich daraus ergebenden Chancen greift das vorliegende Buch auf, indem es den aktuellen Stand der Forschung und Praxis zu dem Thema darstellt und die Basisfaktoren des SoLoMo umfassend klärt. Dabei werden die Location Based Services (LBS), denen eine Schlüsselrolle im Handel der Zukunft zukommt, besonders gewichtet und mit einer empirischen Studie in Hinblick auf Nutzung sowie Potenzial am Beispiel von KaufDA erforscht. Die Ergebnisse weisen darauf hin, dass die Kunden LBS als attraktiv ansehen und bereit sind, durch sie habitualisiertes Einkaufsverhalten in Frage zu stellen. LBS befinden sich allerdings noch im Anfangsstadium und sind vom Begriff her relativ unbekannt, lassen allerdings große Potenziale erkennen.

Brand Evolution Elke Theobald, Philipp T. Haisch, 2011-08-25 Das Internet entwickelt sich immer stärker zum Leitmedium für die Unternehmens- und Markenkommunikation. Eine Vielzahl von Kommunikationsinstrumenten gibt den Unternehmen neue Kontaktmöglichkeiten mit dem Kunden. Markenmanager stehen vor der Herausforderung, diese Instrumente im Sinne der modernen Marketingkommunikation ganzheitlich zu führen. Sie müssen die neuen Zugangswege zu ihrer Marke beherrschen, die mit dem Medium neu gewonnene Interaktivität mit der Marke ermöglichen und die Reaktionen und Diskussionen der Konsumenten auf die Markenführung in den sozialen Medien bedienen. Hier setzt das vorliegende Praxishandbuch *Brand Evolution* an. Es präsentiert die wesentlichen Aspekte der Markenführung im Internet. Wissenschaftler stellen die Erkenntnisse der Markentheorie dar, Praktiker aus der verschiedenen Industriezweigen schildern, wie die Instrumente der Markenführung im Netz konkret eingesetzt werden. Fallbeispiele veranschaulichen die Umsetzung in der Unternehmenspraxis.

Cultural Economies of Locative Media Rowan Wilken, 2019-10-09 Location, location awareness and location data have all become familiar and increasingly significant parts of our everyday mobile mediated experiences. *Cultural Economies of Locative Media* examines the ways in which location based services such as GPS enabled mobile smartphones are socially, culturally, economically and politically produced, just as much as they are technically designed and manufactured. Rowan Wilken explores the complex interrelationships that mutually define new business models and the economic factors that emerge around and structure locative media services. Further, he offers readers insight into the diverse social uses, cultures of consumption and policy implications of location, providing a detailed critical account of contemporary location sensitive mobile data. *Cultural Economies of Locative Media* delves into the ideas, technologies, contexts and power relationships that define this scholarship, resulting in a rich portrait of locative media in all of its cultural and economic complexity.

Facebook and the influence on our daily lives Maximilian Mayr, 2019-05-14 Pre University Paper from the year 2011 in the subject Communications Public Relations Advertising Marketing Social Media grade 14 Punkte course Englisch Leistungskurs language English abstract After writing this Facharbeit I can proudly say that I am much more informed about Facebook and how it influences our daily lives From now on I know very much about Mark Zuckerberg and the history of Facebook as a company Mark Zuckerberg is a very interested and talented person with a good sense of modern trends He has founded Facebook for the right reasons and I think he is only that successful because he always was more interested in satisfying users than making money with his projects Facebook is the most successful social networking site and although Facebook involves some dangers like cyber attacks or becoming addicted to Facebook I fortunately can say that no one of them concerned me up to now For the future I am well informed about how I can use Facebook safely and efficiently so I have nothing to fear from Due to the great possibilities Facebook offers to government agencies politicians and companies it has developed to one of the most important and useful Internet platforms worldwide Government agencies and politicians have a new platform to disseminate information and to advertise for themselves Concerning these new possibilities nowadays

government agencies and politicians are able to confront more target groups with politics and important news than they could without this platform Companies are enabled to make personalised advertising so they are able to maximize their profits Furthermore Facebook and other social media proved their importance nowadays when we look at what have happened in Egypt The revolution in Egypt initiated by groups of demonstrators who has communicated and organized their plans via Facebook probably would never had occurred without the capabilities Facebook offers

Luce, 2010-04 *The Professional Geologist* ,2009 **Social Networks - Blessing Or Curse?** Ruben Picard, 2011-05-09 Facharbeit Schule aus dem Jahr 2011 im Fachbereich Didaktik f r das Fach Englisch Er rterungen und Aufs tze Note 2 St dt Heinrich Heine Gymnasium Mettmann Sprache Deutsch Abstract In the past few years a great number of social networks have appeared on the internet Though the term social network seems to be something new something associated with the world wide web and new technologies social networks have existed ever since men have Any

interacting group of people can be considered a social network and is defined by the relationships between the individuals. That makes it really interesting to find a system that was part of our lives from the cradle of humankind being faced with such a young invention called the internet. What they all have in common is that they try to connect people by providing a platform meant to help users communicate in the most convenient and entertaining way possible or by providing a matchless network service that specialises in a particular area e.g. music or news. I decided to write a research paper about social networks on the internet because I could hardly distinguish whether my own use of such services is either beneficial or reprehensible. These days new services on the internet that promise to be very entertaining or apparently have a high potential to improve or simplify the way we work and communicate seem to be very attractive to a wide range of internet users. While some people are quite sceptical about online services like social networks, others tend to use them without even considering any potential risks. Are they just blinded by the revolutionary possibilities based on the Web 2.0 or do we actually not have anything to fear? The social network Facebook will serve as my basic example for the analysis of social networks because it is the most used and thereby most discussed social network on the world wide web; its structure also generally represents other similar networks. These social networks are surprisingly entertaining especially for younger people. But can we trust a completely new way of communication? Considering that almost all social networks are completely free, the question comes up how they can be financed. Do social networks help us organise our lives by providing virtual groups, calendars and event managers? Will these groups even be able to represent political interests? And what about the lack of privacy social networks possibly promote? Among other aspects I want to deal with the above mentioned questions by analysing the way social networks operate and weighing the benefits and disadvantages of social networks on the internet.
