More Than a Doll Jodi Bondi Norgaard,2025-01-21 When Jodi Bondi Norgaard an experienced entrepreneur

attempted to shake up the toy industry with a sports doll that appeals to today's more athletic adventurous girls she came to realize the roadblocks to success weren't only reluctant toy buyers but a patriarchal culture that perpetuates gender roles and sexism *More Than a Doll* is about her mission to break gender stereotypes and challenge the status quo Through illuminating testimonials data research interviews and cultural observations readers will come away with clear examples of the dangers of early gender stereotyping and how we continue to fail to see the harm After all It's just a toy It's just a t shirt It's just a show Bondi Norgaard is sounding the siren that gender inequality doesn't begin in our teens it begins the moment a child can hold a toy or book or watch a screen The programming starts early and the impact is lifelong

Professional Development Leadership and the Diverse Learner Jack Rhoton, Patricia Bowers, 2001 This book focuses on the professional development of teachers and discusses issues related to science education reform The content of the book is divided into two parts Part 1 Professional Development Implications for Science Leadership chapters include 1 The Role of the Science Leader in Implementing Standards Based Science Programs Harold Pratt 2 Moving Teachers from Mechanical to Mastery The Next Level of Science Implementation JoAnne Vasquez and Michael B Cowan 3 Learning and Teaching Critical Thinking Skills in the Information Age A Challenge in Professional Development for Science Teachers J Preston Prather and Maurice Houston Field 4 Bringing about School Change Professional Development for Teacher Leaders Josephine D Wallace Catherine R Nesbit and Carol R Newman 5 Building Capacity for Systemic Reform in Mathematics and Science Education A Focus on a Develop the Developer Model Karen J Charles and Francena D Cummings and 6 The Precollege Program A Collaborative Model of Student Enrichment and Professional Development in Mathematics and Science Patricia S Moyer and Eric D Packenham Part 2 Professional Development and the Diverse Learner chapters include 1 LEARN North Carolina A Teacher Directed Model of Technology Integration David J Walbert 2 Teaching Science to Diverse Learners A Professional Development Perspective Paul Rowland Donna Montgomery Greg Prater and Sam Minner 3 Leadership in a Multicultural World Transforming Today's Science Classrooms Deborah J Tippins and Sharon E Nichols 4 Knowing Others and Other Ways of Knowing Cultural Issues in the Teaching of Science M Elaine Davis 5 Reform and Museums Enhancing Science Education in Formal and Informal Settings Judith K Sweeney and Susan E Lynds 6 Access to Technology The Equity Dilemma for Science Educators Rebecca P Butler and 7 Principles and Practices in Multicultural Science Education Implications for Professional Development Gerry M Madrazo Jr and Jack Rhoton YDS

Hard-to-Teach Science Concepts Susan Koba, Carol T. Mitchell, 2011 Authors Susan Koba and Carol Mitchell introduce teachers of grades 3-5 to their conceptual framework for successful instruction of hard to teach science concepts Their methodology comprises four steps 1 engage students about their preconceptions and address their thinking 2 target lessons to be learned 3 determine appropriate strategies and 4 use Standards based teaching that builds on student understandings The authors not only explain how to use their framework but also provide a variety of tools and examples of its application on four hard to teach foundational concepts the flow of energy

and matter in ecosystems force and motion matter and its transformation and Earth's shape Both preservice and inservice elementary school teachers will find this approach appealing and the authors engaging writing style and user friendly tables help educators adapt the method with ease

The Internet of Women - Accelerating Culture Change Nada Anid, Monique J. Morrow, Laurie Cantileno, 2022-09-01

Female scientists, technologists, engineers, and mathematicians worldwide are making historic contributions to their fields. The modern workforce is closer to gender equal than it has ever been, and many efforts are in place to support further progress. The Internet of Women provides an exciting look at personal narratives and case studies of female leaders and cultural shifts around the globe that illustrate this promising trend. From the United Nations emphasis on girls and technology education in the SDGs Sustainable Development Goals to the increased female labor force in Zambia, a policy change that was inspired by the MDGs UN Millennium Development Goals. The Internet of Women captures stunning examples of progress from around the world and men working hand in hand with women advocating for cultural change. Scholars and practitioners lament the lack of women leading and working in leading organizations in the technology industry. Gender equality and female participation in the tech field is critical to both developing and developed economies; nevertheless, this gap remains a global phenomenon. The lack of female leadership is particularly extreme at the highest echelons of leading technology organizations. Few publicly traded tech companies have female CEOs; in fact, most nations have zero female leadership in the tech industry. This gap does indicate a slow pace of progress for gender equality in tech employment. Women's pay still lags nearly a decade behind according to the World Economic Forum, meaning that women's on average pay today is the equivalent to that of similarly qualified and similarly employed men in 2006. Without significant progress, the current rate of change will not lead to parity for 118 years according to the World Economic Forum (WEF). However, there's significant work being done to shift this tide. Take for instance Michelle Lee, the first female Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (USPTO). She reflects on her childhood Girl Scout badge in sewing and cooking and how that memory inspired her to create an IP badge that exposes young women to the process of invention. Social entrepreneur, investor, and Malala Fund co-founder Shiza Shahid shares her efforts beginning from mentoring young women in Pakistan to her current work directing more investment to women innovators around the globe. And Elizabeth Isele, a senior fellow in Social Innovation at Babson College, shares her research on women and ageism, saying we need to retire the word retirement. The book is divided into six parts, each with unique areas of focus: Millennials Leading, Exploring Challenges and Opportunities Facing the Next Generation of Women in Technology, Men and Women Empowering One Another, Bold Leadership, Women Changing the Culture of Investment and Entrepreneurship, Educating for the 21st Century, Breaking the Glass Ceiling, A Generation of Women Forging into Technology Leadership, Emerging Fields of Technology. The Internet of Women gathers examples about the increasingly inclusive and progressive gender culture in technology from over 30 countries. Stories range from an entrepreneur in Dubai partnering with private

and public sector entities to accelerate blockchain technology to a young British woman moving to Silicon Valley to launch an artificial intelligence platform and incubator The book is intended for corporations academic institutions the private sector government agencies gender experts and the general public and its key benefit is to let the reader understand a path towards implementing diversity overall globally It also showcases the strategies tools and tactical execution on how create cultural change in all parts of the world

High Possibility STEM Classrooms Jane Hunter,2020-12-21 This book offers a new research based approach to STEM education in early elementary and middle years of schooling concentrating on building teacher agency and integrated approaches to teaching and learning in High Possibility STEM Classrooms Author Jane Hunter presents a globally oriented contemporary framework for powerful Integrated STEM based on mixed methods research data from three studies conducted in 14 schools in language diverse disadvantaged and urbanized communities in Australia Theory creativity life preparation public learning and contextual accommodations are all utilized to help educators create hands on inquiry led and project based approaches to STEM education in the classroom A set of highly accessible case studies is offered that places pedagogy at the center of practice an approach valuable for researchers school leaders and teachers alike Ultimately this text responds to the call for examples of what successful Integrated STEM teaching and learning looks like in schools The book concludes with an evidence based blueprint for preparing for less siloed and more transdisciplinary approaches to education in schools Hunter argues not only for High Possibility STEM Classrooms but for High Possibility STEM Schools enriching the dialogue around the future directions of STEM STEAM middle leadership technological literacies and assessment within contemporary classrooms

Science Teacher Educators as K-12 Teachers Michael Dias,Charles J. Eick,Laurie Brantley-Dias,2013-07-08 Science teacher educators prepare and provide professional development for teachers at all grade levels They seek to improve conditions in classroom teaching and learning professional development and teacher recruitment and retention Science Teacher Educators as K 12 Teachers Practicing What We Teach tells the story of sixteen teacher educators who stepped away from their traditional role and entered the classroom to teach children and adolescents in public schools and informal settings It details the practical and theoretical insights that these members of the Association of Science Teacher Educators ASTE earned from experiences ranging from periodic guest teaching to full time engagement in the teaching role Science Teacher Educators as K 12 Teachers shows science teacher educators as professionals engaged in reflective analysis of their beliefs about and experiences with teaching children or adolescents science With their ideas about instruction and learning challenged these educators became more aware of the circumstances today s teachers face Their honest accounts reveal that through teaching children and adolescents teacher educators can also renew themselves and

expand their identities as well as their understanding of themselves in the profession and in relation to others Science Teacher Educators as K 12 Teachers will appeal to all those with an interest in science education from teacher educators to science teachers as well as teacher educators in other disciplines Its narratives and insights may even inspire more teacher educators to envision new opportunities to serve teachers K 12 learners and the local community through a variety of teaching arrangements in public schools and informal education settings

Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents

Popular Science, 1956-01 Popular Science gives our readers the information and tools to improve their technology and their world The core

belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **ENC Focus** ,2000 The Sky Detective Azadeh Tabazadeh,2015-04-30 When Azadeh was an eight year old girl growing up in Iran in March 1973 her uncle gave her a chemistry kit That got her hooked on science early and provided an opportunity for her to find herself In The Sky Detective Azadeh shares her life story one that includes an insiders look at life during the Islamic Revolution and Iraqi War and details how one little girl grew up to become a gifted scientist Set inside Iran in the final years of the monarchy the author narrates a true story of friendship between two girls growing up in the same household in Tehran Azadeh the daughter of an affluent engineer and Najmieh a child servant who arrives from a small village in northern Iran to live with Azadehs family When the girls are teenagers political turmoil interrupts their lives sending them down different paths This memoir recalls friendship and faith the bonds between parents and daughters in a paternalistic society and the clash of values among relatives from different generations in a family The Sky Detective describes the rich culture of a beautiful but deeply troubled land undergoing radical transformation In spite of the hardship that comes along with the establishment of a theocratic regime Azadeh shows her will and determination as a young woman to persevere and realize her childhood dream of becoming a world renowned scientist **Elementary**

Science Methods Lauren Madden,2022-01-12 As teachers and parents we often hear that children are the best scientists Great science teachers tune in to children s interests and observations to create engaging and effective lessons This focus on the innate curiosity of children or humans overall is celebrated and used to justify and support efforts around STEM teaching and learning Yet when we discuss elementary school teachers we often hear many inside and outside the classroom report that these teachers dislike fear and feel uncomfortable with science This is exactly the opposite approach from what is universally recommended by science education scholars This practical textbook meets the immediate contextual needs of future and current elementary teachers by using an assets based approach to science teaching showing how to create inquiry based lessons differentiate instruction and lesson design based on children s developmental ages and needs and providing easy to use tools to advocate for scientific teaching and learning guided by the Next Generation Science Standards NGSS
