Motivational Dialogue Preparing Addiction Professionals For Motivational Interviewing Practice:

Motivational Dialogue Gillian Tober, Duncan Raistrick, 2014-01-02 Motivational Dialogue explores the application of motivational interviewing in various contexts with a view to enhancing understanding and improving practice. The book describes the research and practice of motivational interviewing as a stand alone intervention as an adjunct to further treatment and as a style of delivery of social and behavioural interventions. The contributors draw on their expertise and experience as researchers, teachers and practitioners to encourage the reader to appreciate the broad applicability of motivational dialogue. The book is divided into five sections which cover reflections and a model, the evidence base, learning and practice, four studies of motivational therapy in practice, motivational dialogue and stepped care. Motivational Dialogue will be of great interest to psychiatrists, clinical psychologists and anyone in the social and health care professions who is involved in assisting people to challenge addictive behaviours.

Seminars in Addiction Psychiatry Ed Day, 2021-11-04 This extensively revised new edition provides a practical guide to understanding, assessing and managing physical, psychological and social complications related to drug and alcohol use. It presents a clear review of the aetiology, epidemiology, prevention and treatment of the problematic use of and dependence on alcohol, illicit and prescribed drugs. In doing so, it strikes a balance between theory, recent research and practical clinical guidance. New chapters focus on novel psychiatric substances, smoking cessation, interventions, mutual aid groups and family interventions. Written by leading specialists in the field and closely following the MRC Psych curriculum, this book is an ideal resource for trainees preparing for their RCPsych membership examinations but is also relevant to psychiatrists at all career levels. It will also appeal to other healthcare professionals, all of whom should be able to screen for alcohol and drug use disorders, deliver brief interventions and signpost those with more severe disorders to specialist care.

The contributors have drawn on the latest research, best practice and lessons learnt over the past decade of Framework implementation to equip practitioners from different disciplines to identify the developmental needs of children, assess parental capacity and evaluate the impact of family, economic and environmental factors on the carer's ability to meet the needs of the child. This book is essential reading for all practitioners, managers, trainers and educators in children's and adult services who use the Framework and will also be a valued source of knowledge and guidance for those assessing children's needs in legislative contexts outside of England.
