

7. Starting with the positive (+) lead, reconnect the battery cables to the engine starting battery.

IMPORTANT: Do not connect a common ground bond cable between 36-volt and 12-volt electrical circuits.

Activating the Wireless Foot Pedal

Each wireless foot pedal and wireless handheld remote has a unique serial number, and each wireless controller must be synced individually to the trolling motor receiver. The trolling motor receiver can sync up to 40 wireless controllers. This ensures that the trolling motor will respond to commands only from designated controllers. Follow the instructions below to activate a wireless controller with your trolling motor. For erasing and reprogramming information, refer to **Section 6—Erasing the Receiver's Memory** and **Section 6—Reprogramming the Wireless Foot Pedal or Remote**.

IMPORTANT: To activate multiple foot pedals or remotes, the motor must be unplugged from the power source and then plugged back into the power source between activating each control device.

1. Connect the battery cables to the battery, or plug in the battery cable to a power source. Within ten seconds of connecting the battery cables to their terminals, press and hold the **propeller** and **anchor** buttons on the wireless foot pedal simultaneously.
2. Listen for a multitone beep, indicating that the receiver has synced the electronic serial number.

3. To turn the pedal on or off, press and hold the **anchor** button. One beep from the foot pedal indicates that the foot pedal is turned on, two beeps indicate that the foot pedal is turned off.

Activating the Handheld Remote

1. If the trolling motor battery cables are connected, disconnect the battery cables from the trolling motor battery, starting with the negative (-) lead.
