Handbook of Competence and Motivation Andrew J. Elliot, Carol S. Dweck, David S. Yeager, 2017-03-24 Now completely revised over 90% new this handbook established the concept of competence as an organizing framework for the field of achievement motivation With an increased focus on connecting theory to application the second edition incorporates diverse perspectives on why and how individuals are motivated to work toward competence in school work sports and other settings Leading authorities present cutting edge findings on the psychological sociocultural and biological processes that shape competence motivation across development analyzing the role of intelligence self regulated learning emotions creativity gender and racial stereotypes self perceptions achievement values parenting practices teacher behaviors workplace environments and many other factors As a special bonus purchasers of the second edition can download a supplemental e book featuring several notable highly cited chapters from the first edition New to This Edition Most chapters are new reflecting over a decade of theoretical and methodological developments Each chapter now has an applied as well as conceptual focus showcasing advances in intervention research Additional topics self regulation in early childhood self determination theory challenge and threat appraisals performance incentives achievement emotions job burnout gene environment interactions class based models of competence and the impact of social group membership Supplemental e book featuring selected chapters from the prior edition

Motivating the SEL Field Forward Through Equity Nicholas Yoder, Alexandra Skoog-Hoffman, 2021-11-25 Motivating the SEL Field Forward Through Equity looks for a deeper critical understanding of the role of social and emotional learning SEL as a lever for equitable access to the competencies and skills individuals will ultimately need to be successful in school work and life

Encyclopedia of the Sciences of Learning Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its naive theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences

of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences
