I Bytes Technology Industry ITShades.com,2021-01-14 This document brings together a set of latest data points and publicly available information relevant for Technology Industry We are very excited to share this content and believe that readers will benefit from this periodic publication immensely *Programming Massively Parallel Processors* Wen-mei W. Hwu,David B. Kirk,Izzat El Hajj,2022-05-28 *Programming Massively Parallel Processors A Hands On Approach* shows both students and professionals alike the basic concepts of parallel programming and GPU architecture Concise intuitive and practical it is based on years of road testing in the authors own parallel computing courses Various techniques for constructing and optimizing parallel programs are explored in detail while case studies demonstrate the development process which begins with computational thinking and ends with effective and efficient parallel programs The new edition includes updated coverage of CUDA including the newer libraries such as CuDNN New chapters on frequently used parallel patterns have been added and case studies have been updated to reflect current industry practices *Parallel Patterns* Introduces new chapters on frequently used parallel patterns stencil reduction sorting and major improvements to previous chapters convolution histogram sparse matrices graph traversal deep learning Ampere Includes a new chapter focused on GPU architecture and draws examples from recent architecture generations including Ampere Systematic Approach Incorporates major improvements to abstract discussions of problem decomposition strategies and performance considerations with a new optimization checklist *Internet Science* Sotiris Diplaris,Anna Satsiou,Asbjørn Følstad,Michail Vafopoulos,Thomas Vilarinho,2018-03-22 This book constitutes the refereed post conference proceedings of 4 workshops held at the 4th International Conference on Internet Science Thessaloniki Greece in November 2017 the Second International Workshop on the Internet for Financial Collective Awareness and Intelligence IFIN 2017 the International Workshop on Data Economy 2017 the International Workshop on Digital Technology to Support Social Innovation DSI 2017 and the International Workshop on Chatbot Research and Design CONVERSATIONS 2017 The 17 full papers presented together with one short paper were carefully reviewed and selected from 27 submissions The contributions of the IFIN workshop focus on a multidisciplinary dialogue on how to use the internet to promote financial awareness and capability among citizens whereas the papers of the Data Economy workshop show how online data change economy and business The aim of the DSI workshop was to collect the lessons learned from different platforms and settings and to understand the requirements and challenges for building and using digital platforms to effectively engage broad participation in the social innovation process The papers of the Conversations workshop explore the brave new world of human computer communication through natural language gathering latest developments in chatbots research and design

High-performance and hardware-aware computing Rainer Buchty,2014-10-16 High performance system architectures are increasingly exploiting heterogeneity The HipHaC workshop aims at combining new aspects of parallel heterogeneous and

reconfigurable microprocessor technologies with concepts of high performance computing and particularly numerical solution methods Compute and memory intensive applications can only benefit from the full hardware potential if all features on all levels are taken into account in a holistic approach

Generative AI: Foundations, Models and Applications Dr. K. VANITHA SIDAMBARANATHAN, Dr. R. SRIVIDHYA, Dr. P. EDITH LINDA, Dr. LINCE RACHEL VARGHESE, 2025-10-15
Generative AI Foundations Models and Applications provides a comprehensive exploration of one of the most transformative areas of artificial intelligence. Designed for students, researchers, educators, and professionals, this book offers a balanced blend of theory, models, and real-world use cases of generative AI. The text begins by introducing the fundamentals of generative modeling, covering the mathematical and conceptual underpinnings that make generative AI possible. It then progresses into a detailed study of prominent models, including Generative Adversarial Networks (GANs), Variational Autoencoders (VAEs), Diffusion Models, Large Language Models (LLMs), and Multimodal Systems. Beyond the foundations, the book emphasizes the practical applications of generative AI across industries, ranging from natural language processing, computer vision, and healthcare to education, creative arts, business innovation, and scientific research. Ethical considerations, challenges, and future trends are also discussed, equipping readers to critically analyze the opportunities and risks of this rapidly evolving field. With clear explanations, case studies, and an application-driven perspective, this book serves as both an academic resource and a practical guide for those seeking to understand and leverage generative AI in real-world contexts.

Mobile Cloud Visual Media Computing Gang Hua, Xian-Sheng Hua, 2015-11-23
This book explores the internet and mobile ecosystems, which are powered by cloud computing, an essential if not indispensable part of our everyday lives. Billions of users worldwide use this technology for information sharing, communication, and social networking, and a high proportion of activity is driven by massive media content, such as images, videos, and other emerging 3D visual media. However, managing, searching, and visualizing this gigantic amount of data to facilitate communication is difficult, which has led to an influx of innovation and research in these areas. The research is from academics from all around the world, focusing on the intersection of mobile, cloud, visual, and multimedia computing, and is split into five clear parts. Topics covered in the book include mobile augmented reality, computational photography, mobile visual recognition and search, and human-computer interaction (HCI). The findings discussed are meant to spur on further creative development in both academia and industry within this area. Mobile Cloud Visual Media Computing would be of great interest to researchers and academics wishing to see how the state of the art in media computing research is applied to innovative applications, whilst engineers and software designers from industry will gain an insight into the key set of technologies which support mobile and cloud media computing.

Materials Informatics II Kunal Roy, Arkaprava Banerjee, 2025-03-14
This contributed volume explores the application of machine learning in predictive modeling within the fields of materials science, nanotechnology, and cheminformatics. It covers a range of topics, including electronic properties of metal nanoclusters, carbon quantum dots, toxicity assessments of nanomaterials,

and predictive modeling for fullerenes and perovskite materials Additionally the book discusses multiscale modeling and advanced decision support systems for nanomaterial risk management while also highlighting various machine learning tools databases and web platforms designed to predict the properties of materials and molecules It is a comprehensive guide and a great tool for researchers working at the intersection of machine learning and material sciences **Popular Science**
