Navigating Artificial Intelligence for Cultural Heritage Organisations Lise Jaillant, Claire Warwick, Paul Gooding, Katherine Aske, Glen Layne-Worthey, J. Stephen Downie, 2025-06-12 The question of how artificial intelligence and machine learning should be applied to data in libraries and other cultural institutions is a challenge shared by heritage professionals computer scientists and digital humanities scholars As the number of digitised and born digital records grows archival practices are looking to automated systems to manage workloads and make cultural records more accessible AI is playing a crucial role in data management systems within the cultural heritage sector and information professionals are looking for ways to navigate current challenges and opportunities Additionally sector professionals and scholars are benefiting from the many new affordances and innovative research questions offered by using large scale digital collections as data Navigating Artificial Intelligence for Cultural Heritage Organisations explores the innovative technologies and approaches to digitised and born digital records

within libraries and archives across the UK and US and beyond It brings together chapters from experts across the fields of digital humanities computer science and information science alongside professionals within the library and archival sector The authors explore technologies being applied to digitised and born digital records within libraries archives and other heritage organisations including innovative approaches in computer vision Chat GPT and user experience The volume has been designed to reflect current and state of the art technologies and innovations for the preservation and accessibility of digitised and born digital records to help navigate the future of AI for cultural heritage organisations Intelligent Systems and Applications Kohei Arai,2024-07-31 This volume is a collection of meticulously crafted insightful and state of the art papers presented at the Intelligent Systems Conference 2024 held in Amsterdam The Netherlands on 5 6 September 2024 The conference received an overwhelming response with a total of 535 submissions After a rigorous double blind peer review process 181 papers were selected for presentation These papers span a wide range of scientific topics including Artificial Intelligence Computer Vision Robotics Intelligent Systems and more We hope that readers find this volume both interesting and valuable Furthermore we expect that the conference and its proceedings will inspire further research and technological advancements in these critical areas of study Thank you for engaging with this collection of works from the Intelligent Systems Conference 2024 Your interest and support contribute significantly to the ongoing progress and innovation in the field of intelligent systems **Supremacy** Parmy Olson,2024-09-10 WINNER OF THE THE FINANCIAL TIMES AND SCHRODERS 2024 BUSINESS BOOK OF THE YEAR AWARD In November of 2022 a webpage was posted online with a simple text box It was an AI chatbot called ChatGPT and was unlike any app people had used before It was more human than a customer service agent more convenient than a Google search Behind the scenes battles for control and prestige between the world s two leading AI firms OpenAI and DeepMind who now steers Google s AI efforts has remained elusive until now In **Supremacy** Olson tech writer at Bloomberg tells the astonishing story of the battle between these two AI firms their struggles to use their tech for good and the hazardous direction they could go as they serve two tech Goliaths whose power is unprecedented in history The story focuses on the continuing rivalry of two key CEOs at the center of it all who cultivated a religion around their mission to build god like super intelligent machines Sam Altman CEO of OpenAI and Demis Hassabis the CEO of DeepMind **Supremacy** sharply alerts readers to the real threat of artificial intelligence that its top creators are ignoring the profit driven spread of flawed and biased technology into industries education media and more With exclusive access to a network of high ranking sources Parmy Olson uses her 13 years of experience covering technology to bring to light the exploitation of the greatest invention in human history and how it will impact us all *Artificial Intelligence* Alfio Quarteroni,2025-07-19 Artificial intelligence AI is transforming multiple aspects of human life raising fundamental questions Is AI truly intelligent Can it surpass human capabilities What are its risks and opportunities In this book I aim to clarify what AI really is debunking myths while offering a rigorous balanced perspective on its impact Rather than chasing the latest AI

trends I will focus on the core principles that define it tracing its evolution from early pioneers like Alan Turing to today's advanced systems AI remains in the realm of narrow intelligence excelling at specific tasks but far from replicating human cognition Yet its ability to process vast data predict behaviors and generate creative content is reshaping industries from healthcare to finance At the heart of AI's progress is machine learning particularly neural networks which rely more on data-driven training than traditional scientific theory However this innovation comes with challenges environmental costs job market disruptions ethical dilemmas and the black box problem AI's decision-making opacity which raises concerns about trust and accountability AI also plays a growing role in global power dynamics influencing governance security and even democracy Nations leading AI development gain strategic advantages but without careful regulation AI could fuel inequality surveillance and manipulation Despite the fears AI evokes it is neither an existential threat nor a magical solution My goal is not to celebrate or demonize it but to provide a critical framework for understanding this technological revolution By fostering awareness we can shape AI's integration into society in a way that aligns with human values and scientific progress
