Machine Learning and Metaheuristic Computation Erik Cuevas, Jorge Galvez, Omar Avalos, Fernando Wario, 2024-12-24 Learn to bridge the gap between machine learning and metaheuristic methods to solve problems in optimization approaches Few areas of technology have greater potential to revolutionize the globe than artificial intelligence

Two key areas of artificial intelligence machine learning and metaheuristic computation have an enormous range of individual and combined applications in computer science and technology To date these two complementary paradigms have not always been treated together despite the potential of a combined approach which maximizes the utility and minimizes the drawbacks of both Machine Learning and Metaheuristic Computation offers an introduction to both of these approaches and their joint applications Both a reference text and a course it is built around the popular Python programming language to maximize utility It guides the reader gradually from an initial understanding of these crucial methods to an advanced understanding of cutting edge artificial intelligence tools The text also provides Treatment suitable for readers with only basic mathematical training Detailed discussion of topics including dimensionality reduction clustering methods differential evolution and more A rigorous but accessible vision of machine learning algorithms and the most popular approaches of metaheuristic optimization Machine Learning and Metaheuristic Computation is ideal for students researchers and professionals looking to combine these vital methods to solve problems in optimization approaches

Nano-Engineering at Functional Interfaces for Multidisciplinary Applications Sai Sathish Ramamurthy, Seemesh Bhaskar, Narendra Reddy, 2024-10-18 Nano Engineering at Functional Interfaces for Multi disciplinary Applications Electrochemistry Photoplasmonics Antimicrobials and Anticancer Applications provides a comprehensive overview of the fundamentals and latest advances of nano engineering strategies for the design development and fabrication of novel nanostructures for different applications in the fields of photoplasmonics and electrochemistry as well as antibacterial and anticancer research areas The book begins with an introduction to the fundamentals and characteristics of nanostructured interfaces and their associated technologies including an overview of their potential applications in different fields The following chapters present a thorough discussion of the synthesis processing and characterization methods of nanomaterials with unique functionalities suitable for energy harvesting food and textile applications electrocatalysis biomedical applications and more It then concludes outlining research future directions and potential industrial applications Presents the advantages and impact of nano engineering in technological advances with up to date discussions on their applications Covers research directions and potential future applications of nano engineering in industry Includes case studies that illustrate important processes
