Spotify Teardown Maria Eriksson, Rasmus Fleischer, Anna Johansson, Pelle Snickars, Patrick Vonderau, 2019-02-12 An innovative investigation of the inner workings of Spotify that traces the transformation of audio files into streamed experience Spotify provides a streaming service that has been welcomed as disrupting the world of music Yet such disruption always comes at a price Spotify Teardown contests the tired claim that digital culture thrives on disruption Borrowing the notion of teardown from reverse engineering processes in this book a team of five researchers have playfully disassembled Spotify's product and the way it is commonly understood Spotify has been hailed as the solution to illicit downloading but it began as a partly illicit enterprise that grew out of the Swedish file sharing community Spotify was originally praised as an innovative digital platform but increasingly resembles a media company in need of regulation raising questions about the ways in which such cultural content as songs books and films are now typically made available online Spotify Teardown combines interviews participant observations and other analyses of Spotify's front end with experimental covert investigations of its back end The authors engaged in a series of interventions which include establishing a record label for research purposes intercepting network traffic with packet sniffers and web scraping corporate materials The authors innovative digital methods earned them a stern letter from Spotify accusing them of violating its terms of use the company later threatened their research funding Thus the book itself became an intervention into the ethics and legal frameworks of corporate behavior

Musical Genre Mads Krogh, 2025-01-09 From recent decades digitization have emerged a myriad of techniques for mapping musical life identifying patterns in sound or musico cultural practices and compiling labels names tags and classes on an unprecedented scale Proliferating genre catalogs in the context of digital platforms and the conjunction of genre with notions of for example mood and activity are among the consequences which challenge prevailing scene based and identificational understandings in musical genre studies This book answers to this challenge Centering on the concepts of musico generic assemblage and abstraction it offers new perspectives on musical genre fit for current times but with the potential for also reconsidering historical cases

Podcasting Jeremy Wade Morris, 2024-05-31 Podcasting burst onto the media landscape in the early 2000s At the time there were hopes it might usher in a new wave of amateur and professional cultural production and represent an alternate model for how to produce share circulate and experience new voices and perspectives Twenty years later podcasting is at a critical juncture in its relatively young history a moment where the early ideals of open standards and platform neutral distribution are giving way to services that prioritize lean back listening and monetizable media experiences This book provides an accessible and comprehensive account of one of digital media's most vibrant formats Focusing on the historical changes shaping podcasts as a media format the book explores the industrial technological and cultural components of podcasting alongside case studies of various podcasts industry publications and streaming audio platforms e.g. Spotify Google and Apple Podcasts Jeremy Wade Morris argues that as streaming platforms push to make podcasting more industrialized accessible user friendly and similar to other audio media like music or audiobooks they threaten podcasting's early though always unrealized promises This is the go to introduction for students and researchers of media communication and cultural studies as well as readers who enjoy making and listening to podcasts

PJ Harvey and Music Video Performance Abigail Gardner, 2016-03-09 PJ Harvey's performances are premised on the core contention that she is somehow causing trouble Just how this trouble can be theorised within the context of the music video and what it means for a development of the ways we might conceptualise disruption and think about music video lies at the heart of this book Abigail Gardner mixes feminist theory and critical

models from film and video scholarship as a rich means of interrogating Harvey's work and redefining her disruptive strategies. The book presents a rethinking of the masquerade that allies it to cultural memory precipitated by Gardner's claim that Harvey's performances are conversations with the past specifically with visualised memories of archetypes of femininity. Harvey's masquerades emerge from her conversations and renegotiations with both national and transatlantic musical visual and lyrical heritages. It is the first academic book to present analysis of Harvey's music videos and opens up fresh avenues into exploring what is at stake in the video work of one of Britain's premier singer-songwriters. It extends the discussion on music video to consider how to make sense of the rapidly developing digital environment in which it now sits. The interdisciplinary nature of the book should attract readers from a range of subject areas including popular music studies, cultural studies, media and communication studies and gender studies.

Devaluing Public Apologies in the Age of Social Media Joshua M. Bentley, 2024-12-15 In *Devaluing Public Apologies in the Age of Social Media* Joshua M. Bentley argues that apologies are losing their meaning in American society as organizations and public figures treat them as strategical tools without considering their ethical implications. As the demand for apologies in the age of social media continues to increase exponentially, Bentley posits that the apologies that are given carry less and less weight to the public. This book examines how controversial figures like Donald Trump and Joe Rogan as well as brands like Google and Bud Light have addressed public controversies both effectively and ineffectively, illustrating how social media polarization and cancel culture are changing the way apologies are given and received. If apologies are to serve their historical role of resolving conflict peacefully, Bentley argues they must be placed back into their proper ethical context. This book offers insight on how individuals and organizations can ensure their apologies reflect their authentic values. Scholars of communication ethics, media studies, political science and public relations will find it especially useful.

Global Meets Digital Vinod Jain, 2023-06-02 The world today is at the intersection of two megatrends: Globalization and Digitalization, a business revolution unfolding in real time. *Global Meets Digital* captures the many nuances of this revolution succinctly, including its impact on our lives and business. An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years, such as diminishing returns to scale and resource scarcity, are no longer valid for a large and growing number of products and services. The book will challenge you to think differently, not just about digital products but also about physical products. In the global digital world, products are of three kinds: physical, digital, and smart machines (products that are both physical and digital and connected to the internet), a distinction missed by most books on strategy and global business. The economics of each kind of product is distinct from that of the others, which has strategic implications for all kinds of businesses, such as how to compete and how to create and capture value. With several mini case studies and over 100 company examples, the book covers themes and cutting edge issues like the paradox of globalization, digital disruption, disruptive business models, exponential technologies, Internet of Things, competition in digital markets, winner take

all market dynamics Industry 4.0 how to innovate strategizing for the New Normal and value creation and value capture in both B2C and B2B contexts The book derives its underpinnings from the practice of global and digital business while theory remains in the background Intended specifically for an executive professional audience *Global Meets Digital* should also be of value to business students and professors learning to dip their toes into a digital world Vinod Jain is an expert in global and digital strategy award winning professor Fulbright Scholar and author of an MBA textbook *Global Strategy* He taught at the Rutgers Business School Newark and New Brunswick and the Robert H Smith School of Business University of Maryland College Park At Maryland he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School's Executive MBA program in China Since leaving Maryland he has taught in China Denmark Finland Poland and India as a visiting or term professor His opinion pieces have appeared in *The Washington Post* *The Baltimore Sun* *Mensa Bulletin* and *Economic Times* and *Mint India*'s 1 and 2 business dailies among other media In the past he worked as a middle and senior level executive with American and British multinationals Vinod has a PhD in Strategy and International Business from the University of Maryland College Park MS in Management from UCLA and MS and BS Hons in Statistics from the Indian Statistical Institute Calcutta
