Artificial Intelligence Implementation Guide
 Azhar Zia-ur-Rehman, 2025-07-27 AI is inevitable. Every organisation has to adopt it. The challenge is to do this adoption in spite of the risks and the pitfalls. The transformation methodology DIGI4MATION presented by the author in his earlier book has been adopted herein as a customised methodology for the implementation of AI in an organisation. This customised 16 step methodology has been named as AI4mation transformation to AI in the fourth industrial revolution. This book has been written as a detailed guide using which an organisation can successfully transform itself to AI using its internal resources without the help of expensive consultants. A comprehensive set of Appendices has been included to give templates of the most critical deliverables. This Guide is based on Lean Six Sigma TOGAF ISO 42001 ISO 37000 series ISO 38500 series and the ISO 27001 series in addition to other standards. Whether you are starting your AI journey or are deep in the throes of scaling it across your enterprise, this book will give you a framework to think strategically, act systematically and improve continuously. The author has added three case studies, two of them based on actual experience but with masked identity. The third case study, that of a hospital, is AI generated. The author hopes that this Guide proves to be a valuable asset to organisations transforming themselves to adopt AI and saves them heavy costs of consultants. The author remains available for any further guidance or help at azharzr@usa.net or through LinkedIn. The companion Website for this book is ai4mation.org.

 Gosia Szaniawska-Schiavo, 2024-08-26 Did you know that AI can automate up to 58% of customer service interactions? Our study on chatbot statistics also confirmed that almost 1.5 million people had at least one conversation with a chatbot within the past year. Well, AI revolutionized how businesses help their clients. It enabled 24/7 support through chatbots and virtual assistants, increased efficiency and allowed human agents to focus on more complex issues. There is just one issue: Not every chatbot is AI. Simultaneously, not all AI-powered solutions will be perfect for all tasks related to customer service, especially in the ecommerce field. Believe us, we would know. At Tidio, we help 300k businesses worldwide automate customer service, collect leads on autopilot and increase sales. Tidio is one of the most installed chatbot and live chat companies worldwide, specializing in providing tailored customer service solutions.
