Eggleston, 2011-04-28 Ideal for a one semester course this concise textbook covers basic electronics for undergraduate students in science and engineering Beginning with the basics of general circuit laws and resistor circuits to ease students into the subject the textbook then covers a wide range of topics from passive circuits through to semiconductor

based analog circuits and basic digital circuits Using a balance of thorough analysis and insight readers are shown how to work with electronic circuits and apply the techniques they have learnt The textbook s structure makes it useful as a self study introduction to the subject All mathematics is kept to a suitable level and there are several exercises throughout the book Password protected solutions for instructors together with eight laboratory exercises that parallel the text are available online at www.cambridge.org/Eggleston **An Electronics Engineer's Notebook** Orhan Özhan, 2025-09-20 This book features a compilation of applicable and insightful engineering notes extracted from the author s multi decade career in industry and academia The book includes a plethora of modern engineering tools including simulators and platforms like Matlab and LabVIEWTM that have been utilized to support the topics The book is organized into four parts Riddles Simulations Projects and Math The Riddles include puzzling issues encountered in the basic concepts and their various solutions The Simulations section presents examples of challenging simulations such as an ECG telemetry system a software timer IC and a random number generator The section also addresses the weak points of simulators that must be considered The Projects part comprises hardware and software projects from real life including a DTMF pager and a barcode reader The Math part aims to underline the importance of mathematics in engineering For example complex numbers are employed to show how to generate rotating magnetic fields and explain the backward rotating wheels of carts in movies A project exploiting vector algebra calculates the distance and heading between two points on the earth The part is concluded with a Sudoku generator This toolbox of solutions is intended for researchers academics students and professionals in electrical engineering
