Harris, 2019-04-22 Whether planning a new course or searching for new teaching ideas this collection is an indispensable compendium for anyone teaching the Arab Israeli conflict **Teaching History with Big Ideas** S. G. Grant, Jill M. Gradwell, 2010-07-16 In the case studies that make up the bulk of this book middle and high school history teachers describe the decisions and plans and the problems and possibilities they encountered as they ratcheted up their instruction through the use of big ideas Framing a teaching unit around a question such as Why don t we know anything about Africa offers both teacher and students opportunities to explore historical actors ideas and events in ways both rich and engaging Such an approach exemplifies the construct of ambitious teaching whereby teachers demonstrate their ability to marry their deep knowledge of subject matter students and the school context in ways that fundamentally challenge the claim that history is boring The Best of History Web Sites Thomas Daccord, 2007 Educator and technology trainer Thomas Daccord has painstakingly selected and compiled this guide to the best history sites for use in high school academic and public libraries The Best of History Web Sites is the quickest path to a rich variety of content including multimedia presentations subject gateways lesson plans and activities primary resources interactive quizzes and games virtual tours maps and atlases statistical collections and more *Resources in Education* ,1990 *Building Intelligent Agents* Gheorghe Tecuci, 1998-06-23 Building Intelligent Agents is unique in its comprehensive coverage of the subject The first part of the book presents an original theory for building intelligent agents and a methodology and tool that implement the theory The second part of the book presents complex and detailed case studies of building different types of agents an educational assessment agent a statistical analysis assessment and support agent an engineering design assistant and a virtual military commander Also featured in this book is Disciple a toolkit for building interactive agents which function in much the same

way as a human apprentice Disciple based agents can reason both with incomplete information but also with information that is potentially incorrect This approach in which the agent learns its behavior from its teacher integrates many machine learning and knowledge acquisition techniques taking advantage of their complementary strengths to compensate for each others weakness As a consequence it significantly reduces or even eliminates the involvement of a knowledge engineer in the process of building an intelligent agent
