Treatment of cooling water Aquaprox, 2009-12-12 Many cooling systems use water as cooling medium They are found in public buildings industrial production systems or power plants Almost every cooling system using water is degraded by deposition corrosion and microbiological fouling This book identifies the whole bunch of problems due to water cooling systems and proposes specific solutions to all of them The authors have an expertise of over 20 years solving cooling water problems In this book they advise all practitioners which need to plan buy or operate cooling systems

Microbial Approach of Biofiltration in Industrial Wastewater Treatment for the Sustainability of Environment Maulin P. Shah, 2025-02-04 The ever increasing number of pollutants released into the environment drives the search for new treatment technologies or the modification of existing ones In this sense innovation in biofiltration systems seems promising and therefore a book on the current developments and innovations on its subject is very appropriate Biofiltration is a relatively emerging new technology applied to the treatment of wastewater and other toxic substances Over the past two decades this technology has become an economically viable process for treating the wide variety of unruly pollutants released into the environment For example it is speculated that the US biofiltration market will reach more than 100 million by 2020 This book aims to show how innovation in biofiltration can provide effective solutions to overcome the serious problem of water pollution worldwide The removal of contaminants will result from the combined effects of biological oxidation adsorption and filtration processes Many physicochemical and operational factors influence the performance treatment costs and long term stability of biofilters for wastewater treatment This book focuses on identifying factors that affect biofiltration explains their influence and provides guidelines on how to control these factors to optimize better control over the control of pollutants present in wastewater treatment plants The fundamental basis of treatment in biofilters is the action of microorganisms that degrade pollutants and consequently the book also discusses in depth the microbial ecology of biofiltration
