Costanza A. Russo, Rosa M. Lastra, William Blair, 2019. The global financial crisis evidenced the corrosive effects of unethical behaviour upon the banking industry. International Banking and Governance James R. Barth, Dr. Chen Lin, Clas Wihlborg, 2012-01-01. The recent financial crisis has stimulated much debate on the governance of financial institutions as well as research on the effects of governance arrangements on risk taking, performance and financial institutions more generally. Furthermore, researchers are asking how regulation, legislation, politics and other factors influence the governance of financial institutions and their behavior in different dimensions. The specially commissioned contributions featured in this timely Handbook confront these complex issues. The contributors, top international scholars from finance, law and business, explore the role of governance both internal

and external in explaining risk taking and other aspects of the behavior of financial institutions. Additionally, they discuss market and policy features affecting objectives and quality of governance. The chapters provide in-depth analysis of factors such as ownership efficiency and stability, market discipline, compensation and performance, social responsibility, and governance in non-bank financial institutions. Only through this kind of rigorous examination can one hope to implement the financial reforms necessary and sufficient to reduce the likelihood and severity of future crises. Bringing the reader to the frontier of research on governance of financial institutions, this volume is sure to inspire future research in scholars and students of financial institutions, governance and banking as well as all those involved with private financial institutions and public regulatory and supervisory authorities.

From Microfinance to Inclusive Finance R. H. Schmidt, H. D. Seibel, P. Thomes, 2016-09-19. Once praised as a panacea to overcome poverty, microfinance has had to face harsh criticism because of painful failures and unfulfilled expectations. Still, many people in particular in rural regions do not have any access to formal financial services; many microfinance institutions are weak, and others rather exploit their clients, driving them into over-indebtedness rather than helping them out of poverty. What should microfinance achieve? Can it help to build up inclusive financial systems allowing access to basic financial services for everybody? The historic templates for this book are the German Sparkassen and Cooperative banks that have a strong track record of development and growth spanning over 200 years. For obvious reasons, their results cannot be transferred directly into specific solution options to today's challenges in developing countries. Nevertheless, the coming into existence of Sparkassen and Cooperative banks can well be seen as part of a period of revolutionary developments in the European economic and social landscape which can be viewed as analogous to the transformation that emerging economies are undergoing today. While Europe faced dramatically changing living conditions during the period of industrialization, these newly created banks made change possible by unequivocally including the lower class population in the transformation by providing access to savings and loans. And it is this parallel, even in the face of the many differences, which is why their development and success deserves careful consideration today. The authors' approach differs from other explorations by specifically adopting an interdisciplinary strategy. They take into account past developments as well as current global ones from a historical, social science, and economic point of view. Analysis and the interpretation of data is supported by case studies to illustrate their considerations. The authors identify general parameters both for failure and for success and also indicate how to optimize existing potentials both for institutions and policy makers. As a result of this interdisciplinary work, the authors advance an inclusive, stylized facts-based model. They will build up institutions to adhere to corporate social

responsibility and creating conducive legal frameworks form the basic conditions for success More specifically the guiding principles of these successful business models are a fair savings and credit policy the promotion of capital transfers without reference to class and gender a focus on business activities in a well defined region decentralized organizational structures combined with national networks which avoid regional capital drains and the securing of economies of scale and scope Last but not least is the centrality of objectives beyond that of the sheer maximisation of profits
