Social Justice and Islamic Economics Toseef Azid, Lutfi Sunar, 2019-02-25 Under the rule of the current economic order social injustice is ever increasing Issues such as poverty inhumane working conditions inadequate wages social insecurity and an unhealthy labor market continue to persist Many states are also unable to produce policies capable of resolving these problems The characteristics of the capitalist system currently render it unable to provide social justice In fact on the contrary the system reinforces these injustices and prevents economic and social welfare from reaching the masses Many Muslim scholars have analyzed and indeed criticized this system for years This book argues that an alternative and more equitable theoretical and practical economical order can be developed within the framework of Islamic principles On the other hand the experiences of societies under the rule of Muslim governments do not always seem to hold great promise for an alternative understanding of social justice In addition the behaviors of Muslim individuals within their economic lives are mostly shaped by the necessities of daily economic conditions rather than by the tenets of Islam that stand with social justice Until 1990s studies of Islamic economics made connections between finance and the notion of social justice but work conducted more recently has neglected this issue It is therefore evident that the topic of social justice needs to be revisited in a more in depth manner Filling an important gap in existing literature the book uniquely connects social justice and Islamic finance and economics on this topic Theory practice and key issues are presented simultaneously throughout this book which is based on the writings of a number of eminent scholars

Making of an African Giant Dan Mou,2015-10-16 The performance of Nigeria has recently been vehemently criticized as not commensurate with her human and material potentialities The hope that Nigeria is by destiny the African Giant appears to be fading Some analysts seeing this have blamed it on the character defects of the leadership in Nigeria They argue that because the leaders are predatory and corrupt they have preoccupied themselves with their interests which are primitive accumulation and luxurious lifestyles Meanwhile the rest of the citizens are suffering This book argues that such character defects may indeed exist in some of Nigerian leaders However these are not the main reasons for their dismal performance regarding the welfare of the citizens The main problem is that Nigerian leaders seem to have largely lost control over the state and its policies which appear to have been captured by the dominant classes and groups local and international Nigerias main problem is therefore a structural one Nonetheless the book concludes as the security economic political and social crises intensify Nigerian leaders even if it is simply for self preservation will be forced by the objective conditions to move against the interests of these dominant classes and groups It is only then that Nigeria can realistically be restored to the possibility of becoming an African Giant
