Microwaves In The Food Processing Industry Food Science And Technology:

The Microwave Processing of Foods Marc Regier, Kai Knoerzer, 2005-07-27 With such advantages as more rapid heating and preservation of sensory and nutritional quality microwave processing has proved a versatile technology This important book reviews the wealth of recent research on how this technology affects particular foods and how it can be optimised for the food industry Part one discusses current research on how microwaves interact with the dielectric properties of foods and reviews its effects on nutritional and sensory quality Building on this foundation the range of applications of microwave processing from baking and drying to blanching thawing and tempering are reviewed It also looks at packaging issues The final part of the book covers the key area of process measurement and control to ensure more uniform heating of food products With its distinguished editors and international team of contributors The microwave processing of foods is a standard reference for all those wishing to maximise the benefits of this important technology Reviews recent research on how microwave processing affects particular foods Discusses how this technology can be optimised for the food industry An assortment of examples are used to illustrate key points Microwaves in the Food Processing Industry Robert V. Decareau, Richard E. Mudgett, 1985 Background of the development of microwave heating technology Dielectric properties of food Richard E Mudgett Modeling microwave heating characteristics Richard E Mudgett Conveyorized microwave equipments Dehydration Freeze drying Processing of meat and meat products Blanching Baking Thawing Pasteurization and sterilization Future prospects for microwave processing Where do we go from here

Microwave Processing of Foods: Challenges, Advances and Prospects Anubhav Pratap Singh, Ferruh Erdogdu, Shaojin Wang, Hosahalli S. Ramaswamy, 2024-08-27 The application of microwaves has been a major advancement in food processing over the past 50 years and yet to date there have been very few publications focusing exclusively on microwave processing and none covering the latest technological and theoretical advances Microwave Processing of Foods Challenges Advances and Prospects fills this gap by covering all aspects of the microwave processing of foods including the latest novel advances in this fast moving subject area This text presents multidisciplinary views of novel microwave systems novel process modeling engineering and design as well as practical approaches on methodology and findings regarding the effect of microwave on the food quality and process safety The volume comprises several chapters on the newest processing and machinery aspects engineering design and process modeling process safety and novel processes based on full or partial application of microwave in food processing This book also considers economic aspects food quality issues and future trends of microwave application in the food industry Each chapter in this text functions as a critical review presenting the current state of knowledge based on the personal experience of the authors and the current state of published research in one particular area of food processing While the main focus is on processing the physical principles and the chemical and microbiological basis of the process are also covered plus the impact of the technology on the quality and safety of food This

book presents a comprehensive and fully up to date reference on the principles and applications of microwave processing of food products Handbook of Food Science, Technology, and Engineering Yiu H. Hui,2006 Emerging Technologies for Food Processing Da-Wen Sun,2014-08-14 The second edition of Emerging Technologies in Food Processing presents essential authoritative and complete literature and research data from the past ten years It is a complete resource offering the latest technological innovations in food processing today and includes vital information in research and development for the food processing industry It covers the latest advances in non thermal processing including high pressure pulsed electric fields radiofrequency high intensity pulsed light ultrasound irradiation and addresses the newest hurdles in technology where extensive research has been carried out Provides an extensive list of research sources to further research development Presents current and thorough research results and critical reviews Includes the most recent technologies used for shelf life extension bioprocessing simulation and optimization **Encyclopedia of Food Science and Technology** ,1991
