Midyis Test Past Papers:

Philosophy of Education Laura D'Olimpio, Jane Gatley, Ruth Wareham, 2025-09-30 This textbook provides an up to date accessible introduction to the philosophy of education with a focus on the conceptual and normative questions raised by educational policy and practice The key concepts explored include learning teaching indoctrination knowledge equality intelligence virtue and rights Clarifying the meanings of these terms is vital for educators to be able to explain what they do and why Such conceptual analysis helps us to address normative questions about what should or should not be done educationally speaking Each chapter firstly examines one key concept which is then connected to a theorised aim of education The aims considered are rationality i e critical thinking knowledge social justice vocational preparation flourishing and political participation citizenship These aims of education are all hotly debated so their strengths and weaknesses are considered Each chapter concludes with a third section connecting the key concept and aim of education under discussion to an applied example The applied examples include religious schools attainment gaps in education the educational impact of the coronavirus pandemic the curriculum teaching ethics in schools as a form of moral education and citizenship education These applied examples are drawn from vital social and political issues within education By critically engaging with and then building upon extant literature this book demonstrates how conceptual and normative issues within education have real world implications At the end of each chapter there are pedagogical resources designed to support teachers and students These include a chapter summary a list of recommended and further readings and online resources as well as a list of study and research questions This book is essential reading for all undergraduate and postgraduate students of the philosophy of education It is also ideal for use on education theory courses and will be of interest to those studying philosophy or education

How to Run Your Department Successfully Chris Turner, 2005-04-29 It is increasingly being acknowledged that subject leaders hold the key to school improvement and professional development However there is little information available for subject leaders to help them with the day to day practicalities of running a department on top of existing teaching commitments This uniquely practical book deals specifically with current issues faced by subject heads of department HoDs Engagingly and entertainingly written this book covers the major areas of concern to subject leaders including leadership styles managing staff managing pupil performance strategic planning curriculum development and coping with problems

Cross-Linguistic Transfer of Writing Strategies Karen Forbes, 2020-10-19 In the context of increasingly multilingual global educational settings this book provides a timely exploration of the phenomenon of cross linguistic transfer of writing strategies in particular transfer from the foreign language to the first language and presents a compelling case for a multilingual approach to writing pedagogy The book presents evidence from a classroom based intervention study conducted in a secondary school in England on cross linguistic strategy transfer It suggests that even beginner or low proficiency foreign language learners can develop effective skills and strategies in the foreign language

classroom which can also positively influence writing in other languages including their first language This book ultimately encourages more joined up cross curricular cross linguistic thinking related to language in schools by exploring the potential for collaboration between languages teachers

Gifted?: The shift to enrichment, challenge and equity Morgan Whitfield, 2024-07-19 Gifted and talented is a zombie It is dead but still walking around There are new labels to stratify students more able significantly able high aptitude learners New labels do not equal new thinking The concept of gifted is still stubbornly embedded in our educational structures with its legacy of social immobility racism and sexism Students can be more able when they have more financial resources more access more visibility or more cultural acceptance There are pervasive narratives that educators should prioritise extension for some students and not others We can dispel the myth that pitching lessons judiciously to middle ability and then differentiating up and down is effective This book explores how we can provide every student with rigorous challenge Challenge for all is an inclusive approach to teaching whereby every student is invited and given the tools to reach a place of mastery This can be through project based learning Harkness round tables oracy adaptive teaching inclusive enrichment programs dynamic classroom strategies and a schoolwide mission for equity Educators can embed powerful knowledge into the curriculum reimagine teaching to the top and stretch learners through personalised and responsive instruction The shift to enrichment challenge and equity creates magnificent possibilities The message to all students is you belong here
