The 2007 comprehensive spending review Great Britain: Parliament: House of Commons: Treasury Committee, 2007-12-03 This report is in five main sections overall spending issues efficiency and value for money the new performance management framework child poverty and individual spending settlements The planned rate of growth of public spending is set to be considerably slower than the rate of growth of recent years This could lead to cost pressures on departmental spending as there will be a greater proportional growth in the Annual Managed Expenditure There will also be cost pressures from public sector wage settlements population growth and needs in particular sectors The efficiency programmes are highly ambitious but the Committee recommends that savings should only be recorded if it could be shown that service standards have been maintained There is a welcome for the decision not to impose explicit targets for reduction in Civil Service numbers On child poverty the Committee note a possible tension between the target to halve child poverty by 2010-11 and that of eliminating child poverty by 2020 There is a concern that the Government has drawn back from a whole hearted commitment to meet the 2010 target They want the Government to either initiate a debate on the trade off between the two targets or rededicate itself to the 2010-11 target making it clear that the resources are available within the Comprehensive Spending Review
