Handbook of Natural Language Processing and Machine Translation Joseph Olive,Caitlin Christianson,John McCary,2011-03-02 This comprehensive handbook written by leading experts in the field details the groundbreaking research conducted under the breakthrough GALE program The Global Autonomous Language Exploitation within the Defense Advanced Research Projects Agency DARPA while placing it in the context of previous research in the fields of natural language and signal processing artificial intelligence and machine translation The most fundamental contrast between GALE and its predecessor programs was its holistic integration of

previously separate or sequential processes In earlier language research programs each of the individual processes was performed separately and sequentially speech recognition language recognition transcription translation and content summarization The GALE program employed a distinctly new approach by executing these processes simultaneously Speech and language recognition algorithms now aid translation and transcription processes and vice versa This combination of previously distinct processes has produced significant research and performance breakthroughs and has fundamentally changed the natural language processing and machine translation fields This comprehensive handbook provides an exhaustive exploration into these latest technologies in natural language speech and signal processing and machine translation providing researchers practitioners and students with an authoritative reference on the topic

Visible Learning for Teachers John Hattie,2012-03-15 In November 2008 John Hattie s ground breaking book Visible Learning synthesised the results of more than fifteen years research involving millions of students and represented the biggest ever collection of evidence based research into what actually works in schools to improve learning Visible Learning for Teachers takes the next step and brings those ground breaking concepts to a completely new audience Written for students pre service and in service teachers it explains how to apply the principles of Visible Learning to any classroom anywhere in the world The author offers concise and user friendly summaries of the most successful interventions and offers practical step by step guidance to the successful implementation of visible learning and visible teaching in the classroom This book links the biggest ever research project on teaching strategies to practical classroom implementation champions both teacher and student perspectives and contains step by step guidance including lesson preparation interpreting learning and feedback during the lesson and post lesson follow up offers checklists exercises case studies and best practice scenarios to assist in raising achievement includes whole school checklists and advice for school leaders on facilitating visible learning in their institution now includes additional meta analyses bringing the total cited within the research to over 900 comprehensively covers numerous areas of learning activity including pupil motivation curriculum meta cognitive strategies behaviour teaching strategies and classroom management Visible Learning for Teachers is a must read for any student or teacher who wants an evidence based answer to the question how do we maximise achievement in our schools
