

The background of the slide features a close-up, slightly blurred image of laboratory glassware. In the foreground, several test tubes are visible, each containing a different colored liquid: yellow, red, green, and blue. Behind them, there are larger Erlenmeyer flasks and beakers, some containing orange or reddish liquids. The lighting is bright, creating a clean and scientific atmosphere.

Science Research Writing: For Native And Non-native Speakers Of English (Second Edition) Hilary Glasman-deal, 2020-11-27 This book enables STEM researchers to write effective papers for publication as well as other research related texts such as a doctoral thesis technical report or conference abstract Science Research Writing uses a reverse engineering approach to writing developed from extensive work with STEM researchers at Imperial College London This approach unpacks current models of STEM research writing and helps writers to generate the writing tools needed to operate those models effectively in their own field The reverse engineering approach also ensures

that writers develop future proof strategies that will evolve alongside the coming changes in research communication platforms The Second Edition has been extensively revised and updated to represent current practice and focuses on the writing needs of both early stage doctoral STEMM researchers and experienced professional researchers at the highest level whether or not they are native speakers of English The book retains the practical user friendly format of the First Edition and now contains seven units that deal separately with the components of written STEMM research communication Introduction Methods Results Discussion Conclusion Abstract and Title as well as extensive FAQ responses and a new Checklist and Tips section Each unit analyses extracts from recent published STEMM journal papers to enable researchers to discover not only what to write but crucially how to write it The global nature of science research requires fast accurate communication of highly complex information that can be understood by all participants Like the First Edition the Second Edition is intended as a fast do it yourself guide to make both the process and the product of STEMM research writing more effective

Social Science Research Ethics in Africa Nico Nortjé, Retha Visagie, J. S. Wessels, 2019-05-23 This book gives a voice to debates surrounding social science research ethics in Africa and brings them together in a coherent form to assist readers in being at the forefront of the discussions The book gives an overview of the importance of research ethics in social sciences as well as articulating the African influence on the subject matter Subsequently it looks into specific frameworks and tools that researchers can apply in the process of doing research Last but not least it also takes an in depth look at traditional ethical issues pertaining to research in social sciences through the lens of the African continent This is the first book on social science research ethics in an African context and an indispensable resource for researchers students policy makers and research institutions in or interested in African research ethics
