SEC Docket United States. Securities and Exchange Commission, 2012 **Business Ethics** Gael McDonald, 2015

Business Ethics introduces students to ethical issues and decision making in a variety of contemporary contexts The book addresses corporate social responsibility stakeholder management and sustainability It develops an awareness of the many ways in which ethical considerations can manifest in commercial domains thereby helping prepare students for their professional careers **Understanding Collaborative Consumption** Pia A. Albinsson, B. Y. Perera, Stephanie J.

Lawson, 2024-04-12 This dynamic book explores the importance of collaborative consumption which is particularly relevant at a time when the sharing economy has established itself as part of the mainstream market Nearly 40 expert scholars across the globe go beyond the existing literature to investigate understudied community efforts and spaces including innovative topics such as hand me downs and coworking **Market definition and market power in the platform economy**

Jens-Uwe Franck, Martin Peitz, 2019-05-08 With the rise of digital platforms and the natural tendency of markets involving platforms to become concentrated competition authorities and courts are more frequently in a position to investigate and decide merger and abuse cases that involve platforms This report provides guidance on how to define markets and on how to assess market power when dealing with two sided platforms **DEFINITION** Competition authorities and courts are well advised to uniformly use a multi markets approach when defining markets in the context of two sided platforms The multi markets approach is the more flexible instrument compared to the competing single market approach that defines a single market for both sides of a platform as the former naturally accounts for different substitution possibilities by the user groups on the two sides of the platform While one might think of conditions under which a single market approach could be feasible the necessary conditions are so severe that it would only be applicable under rare circumstances To fully appreciate business activities in platform markets from a competition law point of view and to do justice to competition law s purpose which is to protect consumer welfare the legal concept of a market should not be interpreted as requiring a price to be paid by one party to the other It is not sufficient to consider the activities on the unpaid side of the platform only indirectly by way of including them in the competition law analysis of the paid side of the platform Such an approach would exclude certain activities and ensuing positive or negative effects on consumer welfare altogether from the radar of competition law Instead competition practice should recognize straightforwardly that there can be markets for products offered free of charge i e without monetary consideration by those who receive the product **ASSESSMENT** The application of competition law often requires an assessment of market power Using market shares as indicators of market power in addition to all the difficulties in standard markets raises further issues for two sided platforms When calculating revenue shares the only reasonable option is to use the sum of revenues on all sides of the platform Then such shares should not be interpreted as market shares as they are aggregated over two interdependent markets Large revenue shares appear to be a meaningful indicator of market power if

all undertakings under consideration serve the same sides However they are often not meaningful if undertakings active in the relevant markets follow different business models Given potentially strong cross group external effects market shares are less apt in the context of two sided platforms to indicate market power or the lack of it Barriers to entry are at the core of persistent market power and thus the entrenchment of incumbent platforms They deserve careful examination by competition authorities Barriers to entry may arise due to users coordination failure in the presence of network effect On two sided platforms users on both sides of the market have to coordinate their expectations Barriers to entry are more likely to be present if an industry does not attract new users and if it does not undergo major technological change Switching costs and network effects may go hand in hand consumer switching costs sometimes depend on the number of platform users and in this case barriers to entry from consumer switching costs increase with platform size Since market power is related to barriers to entry the absence of entry attempts may be seen as an indication of market power However entry threats may arise from firms offering quite different services as long as they provide a new home for users attention and needs

The Routledge International Handbook of Public Administration and Digital Governance Sarah Giest,Ian Roberge,2024-12-30 The Routledge Handbook of Public Administration and Digital Governance is a comprehensive cutting edge guide for students scholars practitioners of public policy public administration and digital governance The book demonstrates the diverse nature of digital government through a series of case studies from different regions across the globe including Africa the Americas Asia and Europe The book uses these cases to highlight various aspects and implications of the intersection of digital technologies and public administration These include impact of practices and principles of public administration the effects of particular technologies tools and the relationship between state and citizen The book also addresses barriers and enablers to the adoption of digital technology with select chapters focusing on artificial intelligence AI in governmental contexts by leading practitioners and scholars Rather than providing region specific lessons the cases identify common challenges offering a more holistic understanding of public administration in the digital era With contributions from both practitioners and scholars this handbook will be a compelling resource for those researching studying or working in public administration public leadership information systems political science and other related fields

Koksal,2023-11-13 Recent studies on competition law and digital markets reveal that accumulating personal information through data collection and acquisition methods benefits consumers considerably Free of charge fast and personalised services and products are offered to consumers online Collected data is now an indispensable part of online businesses to the point that a new economy a data driven sector has emerged Many markets such as the social network search engine online advertising and e commerce are regarded as data driven markets in which the utilisation of Big Data is a requisite for the success of operations However the accumulation and use of data brings competition law concerns as they contribute to market power in the online world resulting in a few technology giants gaining unprecedented market power due to the Big Data accumulation indirect network effects and the creation of online ecosystems As technology giants have billions of consumers worldwide data driven markets are truly global In these data driven markets technology giants abuse their dominant positions but existing competition law tools seem ineffective in addressing market power and assessing abusive behaviour related to Big Data This book argues that a novel approach to the data driven sector must be developed through the application of competition law rules to address this It argues that current and potential conflicts can be mitigated by extending the competition law assessment beyond the current competition law tools to offer a modernised and unified approach to the Big Data related competition issues Promoting new legal tests for addressing the market power of technology giants and assessing abusive behaviour in data driven markets this book advocates for cooperation between competition and data protection authorities It will be of interest to students academics and practitioners with an interest in competition law and data protection MeteoWorld ,2008 Monthly Digest of Statistics ,2014 **Global Innovation**
