A Study of Singularities on Rational Curves Via Syzygies David A. Cox, Andrew R. Kustin, Claudia Polini, Bernd Ulrich, 2013-02-26 Consider a rational projective curve C of degree d over an algebraically closed field k . There are n homogeneous forms $g_1, \dots, g_n$ of degree d in $k[x, y]$ which parameterize C in a birational base point free manner. The authors study the singularities of C by studying a Hilbert-Burch matrix φ for the row vector $g_1, \dots, g_n$. In the General Lemma the authors use the generalized row ideals of φ to identify the singular points on C , their multiplicities, the number of branches at each singular point, and the multiplicity of each branch. Let p be a singular point on the parameterized planar curve C which corresponds to a generalized zero of φ . In the Triple Lemma the authors give a matrix φ whose maximal minors parameterize the closure in $\mathbb{P}^2$ of the blow-up at p of C in a neighborhood of p . The authors apply the General Lemma to φ in order to learn about the singularities of C in the first neighborhood of p . If C has even degree $d \geq 2c$ and the multiplicity of C at p is equal to c , then he applies the Triple Lemma again to learn about the singularities of C in the second neighborhood of p . Consider rational plane curves C of even degree $d \geq 2c$. The authors classify curves according to the configuration of multiplicity c singularities on or infinitely near C . There are 7 possible configurations of such singularities. They classify the Hilbert-Burch matrix which corresponds to each configuration. The study of multiplicity c singularities on or infinitely near a fixed rational plane curve C of degree $2c$ is equivalent to the study of the scheme of generalized zeros of the fixed balanced Hilbert-Burch matrix φ for a parameterization of C . *Leveraging Applications of Formal Methods, Verification and Validation* Tiziana Margaria, Bernhard Steffen, 2008-11-05 This volume contains the conference proceedings of ISO/IEC JTC1/SC22/WG2 International Symposium on Leveraging Applications of Formal Methods, Verification and Validation which was held in Porto Sani Kassandra Chalkidiki Greece during October 13-15, 2008, sponsored by EASST and in cooperation with the IEEE Technical Committee on Complex Systems. Following the tradition of its forerunners in 2004 and 2006 in Cyprus and the ISO/IEC JTC1/SC22 Workshops in Greenbelt USA in 2005 and in Poitiers France in 2007, ISO/IEC JTC1/SC22/WG2 provided a forum for developers, users, and researchers to discuss issues related to the adoption and use of rigorous tools and methods for the specification, analysis, verification, certification, construction, test, and maintenance of systems from the point of view of their different application domains. Thus the ISO/IEC JTC1/SC22/WG2 series of events serves the purpose of bridging the gap between designers and developers of rigorous tools and users in engineering and in other disciplines and to foster and exploit synergetic relationships among scientists, engineers, software developers, decision makers, and other critical thinkers in companies and organizations. In particular, by providing a venue for the discussion of common problems, requirements, algorithms, methodologies, and practices, ISO/IEC JTC1/SC22/WG2 aims at supporting researchers in their quest to improve the utility, reliability, flexibility, and efficiency of tools for building systems and users in their search for adequate solutions to their

Conference on Advanced Technology & Particle Physics Maura Barone,2002 This book features up to date technology applications to radiation detection It synthesises several techniques of and approaches to radiation detection covering a wide range of applications and addressing a large audience of experts and students Many of the talks are in fact reviews of particular topics often not covered in standard books and other conferences for instance the medical physics section To present these medical physics talks is crucial since a large fraction of the community in medical physics are from the particle physics community The same feature is true for astroparticle and space physics which are relatively new fields This book is unique in its scope Except for IEEE there is no other conference in the world that presents such a wide coverage of advanced technology applied to particle physics However unlike IEEE more room is made in the book for reviews and general talks
