Neuropsychological Assessment Muriel Deutsch Lezak, Diane B. Howieson, Erin D. Bigler, Daniel Tranel, 2012-03-27. Now in its Fifth Edition, *Neuropsychological Assessment* reviews the major neurobehavioral disorders associated with brain dysfunction and injury. This is the 35th anniversary of the landmark first edition. As with previous editions, this edition provides a comprehensive coverage of the field of adult clinical neuropsychology in a single source. By virtue of the authors' clinical and research specializations, this book provides a broad-based and in-depth coverage of current neuroscience research and clinical neuropsychology practice. While the new edition is updated to include new features and topics, it remains true to the highly regarded previous editions. Methods for obtaining optimum data are given in the form of hypothesis testing techniques, clinical tips, and clinical examples. In the seven years since the previous edition, many advancements have been made in techniques for examining brain function and in our knowledge about brain-behavior relationships. For example, a surge of functional imaging data has emerged, and new structural imaging techniques have provided exquisite detail about brain structure. For the first time, this edition includes examples of these advancements in stunning color. This edition also includes new tools for clinicians, such as a neuroimaging primer and a comparison table of the neuropsychological features of progressive dementias. The chapters on assessment procedures include discussion of issues related to test selection and reviews of recently published as well as older test batteries used in general neuropsychological assessment, plus newly developed batteries for specific issues.

The Oxford Handbook of Externalizing Spectrum Disorders Theodore P. Beauchaine, Stephen P. Hinshaw, 2015-10-01. Recent developments in the conceptualization of externalizing spectrum disorders, including attention deficit hyperactivity disorder, conduct disorder, antisocial personality disorder, and substance use disorders, suggest common genetic and neural substrates. Despite this, neither shared vulnerabilities nor their implications for developmental models of externalizing conduct are captured by prevailing nosologic and diagnostic systems such as the DSM-5. *The Oxford Handbook of Externalizing Spectrum Disorders* is the first book of its kind to capture the developmental psychopathology of externalizing spectrum disorders by examining causal factors across levels of analysis and developmental epochs while departing from the categorical perspective. World-renowned experts on externalizing psychopathology demonstrate how shared genetic and neural vulnerabilities predispose to trait impulsivity, a highly heritable personality construct that is often shaped by adverse environments into increasingly intractable forms of externalizing conduct across development. Consistent with contemporary models of almost all forms of psychopathology, the Handbook emphasizes the importance of neurobiological vulnerability and environmental risk.

interactions in the expression of externalizing behavior across the lifespan The volume concludes with an integrative ontogenic process model of externalizing psychopathology in which diverse equifinal and multifinal pathways to disorder are specified

Making North Carolina Literate Allen W. Trelease, 2004 THIS TITLE IS OUT OF PRINT Founded in 1892 as North Carolina's first state college for women the State Normal and Industrial School quickly transcended its name and original mission From the beginning founder and first President Charles Duncan McIver and his colleagues strove to attain full college status centering on the liberal arts By 1919 that goal was a reality and the institution became the North Carolina College for Women McIver's successor Julius I. Foust set out to make it the state's university for women parallel to the university at Chapel Hill That dream evaporated in the Depression as the Chapel Hill Raleigh and Greensboro campuses consolidated under a single board and most of the graduate work went to Chapel Hill The Greensboro campus became the UNC Woman's College or WC In 1963 all the UNC campuses became coeducational and WC became the University of North Carolina at Greensboro or UNCG UNCG has become a metropolitan university a category sometimes called the land grant

universities of the 21st century Like its peers UNCG offers an education of national if not worldwide repute yet draws the great majority of its students from the surrounding Greensboro Winston Salem High Point metropolitan area Three quarters of its students now live off campus and reflecting its Woman s College origins as well as a national trend two thirds are female This book traces the many sometimes dramatic changes seen at the school college university from its 1892 beginning until 1994 They include the physical campus administrative leadership faculty organization status and professional allegiance the institution versus one s academic discipline the curriculum student identity culture and struggles to win freedom from parietal regulations and shifting alumni relations For many years a perception of underfunding and neglect from above bred identity problems on campus Recent years brought other problems from campus expansion and resultant friction with its neighbors to controversy over athletic scholarships to a brief war over control of the Alumni Association Making North Carolina Literate should be of interest to UNCG alumni faculty and students to readers concerned with North Carolina history women s history and the history of higher education Despite Trelease s long association with UNCG as a professor of history he is concise and unsentimental in his appraisals The result is a well written often witty account of the growth of an educational institution and its larger place in North Carolina and the nation News Record The content and bibliography of this book a comprehensive work in progress for over a decade testify to the author s dedicated research and inclusion of a variety of campus constituents The North Carolina Historical Review Hood s meticulous research his exploration of the rural reform experience during the Progressive era and his willingness to place his topic in a larger historiographical context make it a useful model for others to test how representative Nelson and Washington Counties were The Journal of Southern History

Calarco concludes with recommendations advocating against deficit oriented programs that teach middle class behaviors to working class students Those programs ignore the value of working class students resourcefulness respect and responsibility and they do little to prevent middle class families from finding new opportunities to negotiate advantages in school
