Oxford Mock 12 Maths Compulsory Part Paper:

A Supplement to the Oxford English Dictionary: H-N R. W. Burchfield, 1972 These volumes replace the 1933 Supplement to the OED The vocabulary treated is that which came into use during the publication of the successive sections of the main Dictionary that is between 1884 when the first fascicle of the letter A was published and 1928 when the final section of the Dictionary appeared together with accessions to the English language in Britain and abroad from 1928 to the present day Nearly all the material in the 1933 Supplement has been retained here though in revised form Preface

Mathematicians and their Gods Snezana Lawrence, Mark McCartney, 2015-07-23 To open a newspaper or turn on the television it would appear that science and religion are polar opposites mutually exclusive bedfellows competing for hearts and minds There is little indication of the rich interaction between religion and science throughout history much of which continues today From ancient to modern times mathematicians have played a key role in this interaction This is a book on the relationship between mathematics and religious beliefs It aims to show that throughout scientific history mathematics has been used to make sense of the big questions of life and that religious beliefs sometimes drove mathematicians to mathematics to help them make sense of the world Containing contributions from a wide array of scholars in the fields of philosophy history of science and history of mathematics this book shows that the intersection between mathematics and theism is rich in both culture and character Chapters cover a fascinating range of topics including the Sect of the Pythagoreans Newton s views on the apocalypse Charles Dodgson s Anglican faith and G del s proof of the existence of God

Berndt, 2007 Sir Arthur Conan Doyle s famous fictional detective Sherlock Holmes and his sidekick Dr Watson go camping and pitch their tent under the stars During the night Holmes wakes his companion and says Watson look up at the stars and tell me what you deduce Watson says I see millions of stars and it is quite likely that a few of them are planets just like Earth Therefore there may also be life on these planets Holmes replies Watson you idiot Somebody stole our tent When seeking proofs of Ramanujan s identities for the Rogers Ramanujan functions Watson i e G N Watson was not an idiot He L J Rogers and D M Bressoud found proofs for several of the identities A J F Biagioli devised proofs for most but not all of the remaining identities Although some of the proofs of Watson Rogers and Bressoud are likely in the spirit of those found by Ramanujan those of Biagioli are not in particular Biagioli used the theory of modular forms Haunted by the fact that little progress has been made into

Ramanujan's insights on these identities in the past 85 years the present authors sought more natural proofs. Thus instead of a missing tent we have had missing proofs i.e. Ramanujan's missing proofs of his forty identities for the Rogers Ramanujan functions in this paper for 35 of the 40 identities the authors offer proofs that are in the spirit of Ramanujan. Some of the proofs presented here are due to Watson, Rogers and Bressoud but most are new. Moreover for several identities the authors present two or three proofs. For the five identities that they are unable to prove they provide non-rigorous verifications based on an asymptotic analysis of the associated Rogers Ramanujan functions. This method which is related to the 5-dissection of the generating function for cranks found in Ramanujan's lost notebook is what Ramanujan might have used to discover several of the more difficult identities. Some of the new methods in this paper can be employed to establish new identities for the Rogers Ramanujan functions.
