be on every literature student's bookshelf *Standards and Norms in the English Language* Miriam A. Locher, Jürg Strässler, 2008-08-27 The theme of this collection is a discussion of the notions of norms and standards which are studied from various different angles but always in relation to the English language. These terms are to be understood in a very wide sense allowing discussions of topics such as the norms we orient to in social interaction, the benchmark employed in teaching or the development of English dialects and varieties over time and space and their relation to the standard language. The collection is organized into three parts each of which covers an important research field for the study of norms and standards. Part 1 is entitled English over time and space and is further divided into three thematic subgroups: standard and non-standard features in English varieties and dialects, research on English standardization processes and issues of standards and norms in oral production. Part 2 deals with English usage in non-native contexts and Part 3 is dedicated to Issues on politeness and impoliteness. The notions of standards and norms are equally important concepts for historical linguists, sociolinguists with a variationist background, applied linguists, pragmatics and discourse analysts. **Step by Step** Ana Maria Rojo Lopez, 2009 This book is a course in contrastive linguistics and translation which introduces the basics of linguistic analysis as applied to translation. Translation is presented as a problem-solving activity and linguistic analysis is proposed as a useful methodological tool to identify a wide range of translation problems. The course adopts a method which starts with the translation of words and goes up step by step through the different levels of linguistic structure to the level of pragmatic context. Myriad examples and a wide variety of exercises enable readers to acquire and practise some of the most common strategies translators use to solve the problems encountered at the different levels of linguistic analysis. The book aims at providing students with the theoretical and methodological tools needed to reinforce their linguistic and textual competence in the languages involved and make adequate progress along the translation process. As theoretical tools, students are given an overview of basic translation concepts and linguistic tools central to contrastive linguistics and textual analysis. As methodological tools, students are presented with a working method that at the beginning will allow them to grasp the principles and strategies that govern general translation and which they could later extrapolate to specialised translation.
