responde a una ordenación del contenido en función del contenido temático y el enfoque de cada uno. Así todas las aportaciones recogidas después de un riguroso proceso de evaluación a doble ciego se han agrupado en cinco secciones más este prólogo firmado por las editoras del volumen. Cabe no obstante apuntar que algunos capítulos podrán ubicarse por contenido en varias secciones debido a la dificultad de establecer compartimentos estancos en algunas investigaciones que traspasan los límites de un ámbito de la psicología o de la música tanta es la imbricación que las distintas secciones mantienen entre sí. Quede por tanto aclarado que la distribución realizada en secciones responde a un interés exclusivamente de ordenación del material en función de la mayor aproximación del contenido de cada capítulo a una rama o enfoque específico dentro de la Psicología o de la Música. Creemos que este libro constituye una valiosa aportación de AEPMIM al campo de la Psicología o de la Música poniendo en valor los distintos enfoques y temáticas que se pueden abordar desde esta rama de la psicología. Todas las aportaciones incorporadas a este texto son inéditas y corresponden a investigaciones y proyectos que se desarrollan actualmente fundamentalmente en España si bien se incluyen contribuciones de otros países en menor número. Estamos seguras de que tanto los capítulos con investigaciones empíricas como aquellos que despliegan conocimientos teóricos actualizados y experiencias prácticas pueden contribuir a justificar el título de este libro porque eso es precisamente lo que hemos perseguido poner en conexión la Música y la Psicología: dar noticia de los avances en neurociencia y educación musical en aplicaciones de la música en la salud de músicos y de la sociedad en general ofreciendo insights valiosos sobre la naturaleza humana y abriendo nuevas posibilidades para la terapia, la educación y el desarrollo personal.
