Comparison Study of Riverbed and Cisco Packet Tracer for Networks Building Bilal Ahmad Hamasaheed, 2019 Simulators are a very beneficial networking tool in networking field Deploying the network model without being tested through one of the network simulators won't guarantee the success of the project during the implementation and the outcomes could be unpredictable For all practical purposes network simulators are used to have more chance of success of applying network architecture in the real workplaces without failure With the network simulators the devices of the network are connected to one another After that they all be configured then the implementation of the topology can guaranty of the success of the project as the topology has been tested previously As the real work is started after using more accurate simulator and advanced one and the plan of the network from a softcopy was

converted to the physical one real world with more certainty of success and less failure percentage of failing the project the implementation of the network topology could be easier and increase the success rate of any project compare to deploying a network topology without bring it through simulations process This research work provides a comparison between two of the most common network simulators Cisco packet tracer and Riverbed by simulating an identical topology for both and to choose the practical software to be used for the network lectures of students and even for the industrial use according to some quality criterial analysis and technical differences *Learn Packet Tracer by Examples* Blerton Abazi,2017-04-07

Computer networking professionals getting started with Packet Tracer may find the interface to be flustered Being a development program this is only natural However learning how to configure a router with Packet Tracer will put professionals on the right track to mastering the program in about a day **Network Lab Scenarios II [IP and Routing]** Bob Lee,2019-03-05 Through a variety of hands on scenarios you can become a network expert in a short period of time You can learn the relationship between various protocols and solutions and the operation principle through hands on exercises We recommend Bob Lee s Network Wakku for reference books *Analysis of Packet Signal with TCP Protocol and Network Simulator in Wireless Communication* ,2004 **Becoming Network Expert with Packet Tracer [I]** ,2014-10-05 Features of this book 1 This book gives the fast lane for network expert through cumulative and integrating method about LAN WAN VoIP of network knowledge 2 Thist book gives the most efficient road to be a network consultant and anaylst only with Packet Tracer software 3 You will become a network technician in a month Thanks **Computer Networks in Packet Tracer for Beginners** Damian Strojek,Jerzy Kluczewski,Robert Wszelaki,Marek Smyczek,2023 [Computer Networks in Packet Tracer for Advanced Users](#) Jerzy Kluczewski,2023 [Dasø Routing Information Protocol im Network Simulator 2](#) Sebastian Knieschewski,2005 *Computer Networks in Packet Tracer for Intermediate Users* Damian Strojek,Jerzy Kluczewski,2023 *An Implementation of the Zone Routing Protocol in NS-2 (network Simulator 2)* Prashant Gopal Inamti,2003 [Network Simulation](#) Hemant Bhanoo,2002 Abstract NS 21 a popular network simulator which formed our simulation environment has support for modeling many of the characteristics of networks including node properties packet forwarding routing protocols and transport and link level protocols However a crucial part of investigating the behavior of these components is to be able to provide them with an appropriate workload To do this measurements are taken on a real network and this data used to control the traffic characteristics of the simulation We would like to investigate the feasibility of accurately simulating the traffic of a particular network being able to do so opens up the possibility of answering operations level questions such as what would happen if I moved this server farm from behind router A to behind router B We attacked this problem by choosing to simulate two common types of traffic Our sic results show that a significant error was introduced due to the fact that we only modeled a small proportion of the observed traffic However sic we show that after accounting for this the simulations were able to capture 5 minute average bandwidth quite well This motivates future

work on creating tunable traffic generators for other popular application traffic Doing so would allow us to focus on capturing smaller time scale second sub second properties of a given network *A Network Simulator Based on OSPF Routing Protocol for Network Design and Educational Purposes* Jorge L.
