V-Force Jonathan Glancey, 2025-08-07 As World War II came to an end and America's nuclear bombing of Hiroshima and Nagasaki shocked the world it became clear that the nascent Cold War would be as different a conflagration from WWII as that war was from WWI Believing that the UK was extremely vulnerable to nuclear attack it was quickly determined that only the threat of large scale damage from similar weapons could prevent a Soviet attack And thus V Force was born Entered into service between 1955 and 1957 the three models of V class bombers that made up Britain's strategic nuclear strike force the Vickers Valiant Avro Vulcan and Handley Page Victor were modern marvels of machinery Capable of both high and low level attack with their slick delta wing designs and supremely quick despite the massive bomb loads they carried these aircraft were central tenets of Britain's nuclear weapons development Despite a fall as precipitous as their rise when the Royal Navy took over Britain's nuclear deterrent role in 1968 like a phoenix from the ashes the V bombers enjoyed a second life as conventional bombers the Valiant gaining fame in the Suez Crisis the Victors in the Indonesia Malaysia confrontation and the Vulcans undertook the longest bombing raid in history for Operation Black Buck in the Falklands Campaign of 1982 V Force is both an ode to these most resilient and beautiful of British aircraft and a lens through which to view Britain's Cold War experience

Dam Busters James Holland, 2012-05-10 The night of May 16th 1943 Nineteen specially adapted Lancaster bombers take off from RAF Scampton in Lincolnshire each with a huge 9 000lb cylindrical bomb strapped underneath it Their mission to destroy three dams deep within the German heartland which provide the lifeblood to the industries supplying the Third Reich's war machine From the outset it was an almost impossible task a suicide mission to fly low and at night in formation over many miles of enemy occupied territory at the very limit of the Lancasters capacity and drop a new weapon that had never been tried operationally before from a precise height of just sixty feet from the water at some of the most heavily defended targets in Germany More than that the entire operation had to be put together in less than ten weeks When visionary aviation engineer Barnes Wallis's

concept of the bouncing bomb was green lighted he hadn't even drawn up his plans for the weapon that was to smash the dams. What followed was an incredible race against time which despite numerous setbacks and against huge odds became one of the most successful and game-changing bombing raids of all time.
