conflict Portugal enjoyed virtually unchallenged air supremacy and increasingly based its military strategy and political pacification program on this singular advantage The Portuguese Air Force For a A rea Portuguesa abbreviated FAP consequently played a crucial role in the Guinean war Indeed throughout the conflict the FAP despite the many challenges it faced proved to be the most effective and responsive military argument against the PAIGC rebels which was fighting for the colony s independence from European rule The air war for Guinea stands as a remarkable episode in air power history for several reasons It was for example the first conflict in which a non state irregular force deployed defensive missiles against an organized air force Moreover the degree to which Portugal relied on its air power was such that its effective neutralization doomed Lisbon s military strategy in the province Ultimately the FAP s unexpected combat losses initiated a cascade of effects that degraded in turn its own operational initiative the battlefield effectiveness of increasingly air dependent ground forces Portuguese military morale and national resilience and ultimately Lisbon s tenability as an imperial power The air war for Portuguese Guinea thus represents a compelling illustration of the value and vulnerabilities of air power in a counter insurgency context as well as the negative impacts of overreliance on air supremacy This the second of three volumes in the Sanctuary Lost mini series examines the evolution of Portuguese air power and guerrilla air defenses during the conflict s most active years as both sides sought the means and methods required to counter the other s efforts to control Guinea s airspace It is richly illustrated throughout with original photographs and includes specially commissioned color artworks
