The De Gruyter Handbook of Automated Futures Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23 How does automation affect us our

environment and our imaginations What actions should we take in response to automation Beyond grand narratives and

technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter

Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It

consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and

impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet

constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It

does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing

technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and

governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach

to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook

encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving

landscape of automation
