Semiotic Engineering Methods for Scientific Research in HCI Clarisse Sieckenius De Souza, Carla Faria Leitão, 2009 Semiotic engineering was originally proposed as a semiotic approach to designing user interface languages Over the years with research done at the Department of Informatics of the Pontifical Catholic University of Rio de Janeiro it evolved into a semiotic theory of human computer interaction HCI It views HCI as computer mediated communication between designers and users at interaction time The system speaks for its designers in various types of conversations specified at design time These conversations communicate the designers understanding of who the users are what they know the users want or need to do in which preferred ways and why The designers message to users includes even the interactive language in which users will have to communicate back with the system in order to achieve their specific goals Hence the process is in fact one of communication about communication or metacommunication Semiotic engineering has two methods to evaluate the quality of metacommunication in HCI the semiotic inspection method SIM and the communicability evaluation method CEM Up to now they have been mainly used and discussed in technical contexts focusing on how to detect problems and how to improve the metacommunication of specific systems In this book Clarisse de Souza and Carla Leitão discuss how SIM and CEM which are both qualitative methods can also be used in scientific contexts to generate new knowledge about HCI The discussion goes into deep considerations about scientific methodology calling the reader's attention to the essence of qualitative methods in research and the kinds of results they can produce To illustrate their points the authors present an extensive case study with a free open source digital audio editor called Audacity They show how the results obtained with a triangulation of SIM and CEM point at new research avenues not only for semiotic engineering and HCI but also for other areas of computer science such as software engineering and programming Table of Contents Introduction Essence of Semiotic Engineering Semiotic Engineering Methods Case Study with Audacity Lessons Learned with Semiotic Engineering Methods The Near Future of Semiotic Engineering

A Match to Remember Helen Hawkins, 2024-05-23 I devoured this sporty second chance romance The cute kids sports day a big football match and an old flame are a winning combination Leonie Mack author of A Taste of Italian Sunshine Lizzie Morris is ready for the first day of the rest of her life she's starting as a trainee teacher at Cranswell Primary and she's hopeful that she'll make the squad for the final of her team's football tournament Finally Lizzie seems to be putting her tragic past behind her

and she is sure that her parents would be proud Coming face to face with Noah Hatton however was not part of the plan He is still as athletic and handsome as she remembered and seeing him drags up painful memories Horrifyingly the Head Teacher then asks the pair of them to organise the school s Sports Day and thrown together their chemistry and competitive relationship reignites Will the unwelcome distraction of Noah derail Lizzie s teacher training and will she survive this blast from the past

Empirical Methods for Evaluating Educational Interventions Gary D. Phye, Daniel H. Robinson, Joel Levin, 2005-04-22 New US government requirements state that federally funded grants and school programs must prove that they are based on scientifically proved improvements in teaching and learning All new grants must show they are based on scientifically sound research to be funded and budgets to schools must likewise show that they are based on scientifically sound research However the movement in education over the past several years has been toward qualitative rather than quantitative measures The new legislation comes at a time when researchers are ill trained to measure results or even to frame questions in an empirical way and when school administrators and teachers are no longer remember or were never trained to prove statistically that their programs are effective

Experimental Methods for Evaluating Educational Interventions is a tutorial on what it means to frame a question in an empirical manner how one needs to test that a method works what statistics one uses to measure effectiveness and how to document these findings in a way so as to be compliant with new empirically based requirements The book is simplistic enough to be accessible to those teaching and administrative educational professionals long out of schooling but comprehensive and sophisticated enough to be of use to researchers who know experimental design and statistics but don t know how to use what they know to write acceptable grant proposals or to get governmental funding for their programs Provides an overview to interpreting empirical data in education Reviews data analysis techniques use and interpretation Discusses research on learning instruction and curriculum Explores importance of showing progress as well as cause and effect Identifies obstacles to applying research into practice Examines policy development for states nations and countries
