 Total Amount Spent.....

PRICING PROBLEMS

These items are price-marked. Write very carefully in your box and write the correct price on the tag below each item.

No, no, no! This is all wrong! That beach ball should be \$4.99 less than the sweater, which is supposed to be \$6.00 cheaper than what is marked. The purse is priced way too high! It is only double the price of the sweater's sale price. Hurry and fix the tags before any customers come in!

Scheduling Madness

Stores open all the craziest hours on Black Friday. Some even open for their big sale on Thanksgiving. Read the conversation below to figure out when each store opens and fill in the table with opening times below.

"For today, the way we are going to have to start our shopping after our Thanksgiving meal. Our guests are leaving at four pm, right when Old Navy opens, and Toys R Us opens one hour later."

"Okay, but we need to be at Best Buy to get the great deal on that TV on loan later."

"But what about the cheap tool set on Target? They open at the same time as Best Buy. We can't be in two places at once."

"Yeah, I saw that Lowe's had the same set for even cheaper, and they open in hours AFTER Target does. We will be able to get some sleep before we head there!"

"Okay, two hours after Lowe's opens, we will head to Sam's Club and check out their great deals on cameras."

"Sounds good. But on loan after Sam's opens, we need to be at Gender Hardware Experts to buy that new pocket I want!"

CREATE YOUR OWN ADVERTISEMENT

On a blank piece of paper, create your own store and a Black Friday advertisement that would appear in newspapers.

YOUR AD SHOULD INCLUDE THE FOLLOWING:

- The name of your store
- At least 5 items you sell in your store
- Original Prices and Sale Prices for each item
- The discount amount for each item

Black Friday Math Worksheet Ideas

**William Torrey Harris, Frederic Sturges
Allen**

Black Friday Math Worksheet Ideas:

Educational Times, 1888 **The Didactical Challenge of Symbolic Calculators** Dominique Guin, Kenneth Ruthven, Luc Trouche, 2005-11-13 A significant driver of recent growth in the use of mathematics in the professions has been the support brought by new technologies Not only has this facilitated the application of established methods of mathematical and statistical analysis but it has stimulated the development of innovative approaches These changes have produced a marked evolution in the professional practice of mathematics an evolution which has not yet provoked a corresponding adaptation in mathematical education particularly at school level In particular although calculators first arithmetic and scientific then graphic now symbolic have been found well suited in many respects to the working conditions of pupils and teachers and have even achieved a degree of official recognition the integration of new technologies into the mathematical practice of schools remains marginal It is this situation which has motivated the research and development work to be reported in this volume The appearance of ever more powerful and portable computational tools has certainly given rise to continuing research and development activity at all levels of mathematical education Amongst pioneers such innovation has often been seen as an opportunity to renew the teaching and learning of mathematics Equally however the institutionalization of computational tools within educational practice has proceeded at a strikingly slow pace over many years

Social and Emotional Curriculum for Gifted Students Mark Hess, 2021-09-23 The Social and Emotional Curriculum for Gifted Students series provides the gifted resource specialist regular classroom teacher or counselor with the tools they need to help gifted students in grades 3-5 develop interpersonal skills reflect on their often intense emotions and express their creativity The grade 5 book Contains five units and more than 50 hours of instruction Shares helpful directions for implementing lessons and connecting content across the curriculum Addresses psychosocial skills Features critical thinking activities hands on building and design reading writing creativity and math and science connections Covers relevant topics including resilience growth mindset perfectionism empathy self understanding and identity friendship and what it means to be gifted Each classroom tested lesson addresses one or more affective standards from the National Association for Gifted Children psychosocial development areas for gifted learners and academic standards

Exploring Mathematics Through Literature Diane Thiessen, 2004 This collection of articles and lessons provides classroom examples of how to use children's literature to teach mathematics effectively in prekindergarten through eighth grade The articles focus on five content strands number and operations algebra geometry measurement and data analysis and probability and describe how the different authors have used specific books to help their students learn mathematics Most of the articles involve communication problem solving representation and reasoning and some of them address connections Helpful teacher notes indicate the grade range topic literature selection featured in the lesson materials needed discussion of the mathematics and questions for students Blackline masters of recording sheets are also included for most lessons
