Resilience of Luxury Companies in Times of Change Gabriella Lojacono, Laura Ru Yun Pan, 2021-08-23 Why do some luxury companies remain resilient through times of change while others do not The reason is that these companies have unique skills to diversify their revenue generation by being ambidextrous Luxury companies today cannot depend on their

reputation or their creativity alone to remain resilient rather they require the ability to be ambidextrous to explore new trajectories for future growth and exploiting their iconic values In past decades the industry has shifted from product to customer centric and forced companies to adopt new strategies and approaches to succeed This includes the adoption of digital platforms such as ecommerce social media and mobile enabled tools to continually elevate customer experience In addition new business models have emerged to address growing pains particularly in inventory issues over manufacturing and sustainability Brands today are forced to adopt evolution through innovation that is anchored by new values without compromising their DNA Based on in depth research and interviews with CEOs from leading luxury companies Lojacono and Pan show how companies can hedge their risks and remain resilient in times of change **Empirical Studies on**

Geyer,2021-09-06 The Business of Less rewrites the book on business and the environment For the last thirty years corporate sustainability was synonymous with the pursuit of eco efficiency and win win opportunities The notion of eco efficiency gives us the illusion that we can achieve environmental sustainability without having to question the pursuit of never ending economic growth The win win paradigm is meant to assure us that companies can be protectors of the environment whilst also being profit maximizers It is abundantly clear that the state of the natural environment has further degraded instead of improved This book introduces a new paradigm designed to finally reconcile business and the environment It is called net

green which means that in these times of ecological overshoot businesses need to reduce total environmental impact and not just improve the eco efficiency of their products The book also introduces and explains the four pollution prevention principles again different less and labor not materials Together net green and the four pollution prevention principles provide a road map for businesses and for every household to a world in which human prosperity and a healthy environment are no longer at odds The Business of Less is full of anecdotes and examples This brings its material to life and makes the book not only very accessible but also hugely applicable for everyone who is worried about the fate of our planet and is looking for answers
