Comparing and Aligning Process Representations Han van der Aa, 2018-06-26 This doctoral thesis focuses on the spread of process information in organizations and in particular on the mitigation of the problems caused by the spread of information on a single process over numerous models documents and systems Processes within organizations can be highly complex chains of inter related steps involving numerous stakeholders and information systems Due to this complexity having access to the right information is vital to the proper execution and effective management of an organization s business processes The main contributions of this thesis are five techniques that focus on the alignment and comparison of process information from different informational artifacts Each of these techniques tackles a specific scenario involving multiple informational artifacts that contain process information in different representation formats Wizards vs. Muggles Christopher E. Bell, 2016-02-10 Harry Potter has given the study of popular culture a unique platform for exploring the nature of human identity Potter Studies is developing into a vibrant interdisciplinary field of scholarship This collection of new essays examines issues surrounding race class gender sexual orientation and personal virtue both in the wizarding world and in our own The contributors discuss an array of meanings and contexts in the Harry Potter universe relating to identity issues and the ways in which these manifest in fandom cultures and real world schools and businesses *Iranian Classical Music* Laudan Nooshin, 2017-03-02 Questions of creativity and particularly the processes which underlie creative performance or improvisation form some of the central areas of interest in current musicology Yet the predominant discourses on which musicological thought in this area are based have rarely been challenged In this book Laudan Nooshin interrogates musicological discourses of creativity from the perspective of critical theory and postcolonial studies examining their ideological underpinnings the relationships of alterity which they sustain and the profound implications for our understanding of creative processes in music The repertoire which forms the book s main focus is Iranian classical music a tradition in which the performer plays a central creative role Addressing a number of issues regarding the nature of musical creativity the author explores both the discourses through which ideas about creativity are constructed exchanged and negotiated within this tradition and the practice by which new music comes into being For the latter she compares a number of performances by musicians playing a range of instruments and spanning a period of more than 30 years focusing on one particular section of repertoire dastg h Seg h and providing transcriptions of the performances as the basis for analytical exploration of the music s underlying compositional principles This book is about understanding musical creativity as a meaningful social practice It is the first to examine the ways in which ideas about tradition authenticity innovation and modernity in Iranian classical music form part of a wider social discourse on creativity and in particular how they inform debates regarding national and cultural identity **Incremental Process Discovery** Daniel Schuster, 2025-04-05 This book constitutes the revised version of the award winning PhD dissertation written by the author at RWTH Aachen Germany It

presents a framework for incremental process discovery that allows users to learn and refine process models from event data iteratively Next to process discovery and event data handling it also contributes to conformance checking a further fundamental process mining task Eventually it presents Cortado an open source process mining software tool that implements the algorithms and techniques proposed in an integrated and comprehensive fashion This part also includes a case study applying Cortado and therefore the various contributions of this thesis in a real life scenario In 2024 this PhD dissertation won the Best Process Mining PhD Dissertation Award by the IEEE Task Force for Process Mining granted to outstanding PhD theses in this field
