The Women Who Made Early Disneyland Cindy Mediavilla,Kelsey Knox,2024-01-04 Although historians have begun to recognize the accomplishments of Disney Studio's female animators the women who contributed to the early success of Disneyland remain for the most part unacknowledged Indeed in celebrating the park's ten year anniversary in 1965 Walt Disney thanked all the boys who've been a part of this thing even though hundreds of women had also been instrumental in designing building and operating Disneyland since before its grand opening in July 1955 Seeking to reclaim women's place in the early history of Disneyland The Women Who Made Early Disneyland highlights the female Disney employees and contract workers who helped make the park one of the most popular U S destinations during its first ten years Some like artist Mary Blair Imagineers Harriet Burns and Alice Davis Slue Foot Sue Betty Taylor and Disneyland's first ambassador Julie Reihm eventually became Disney legends Others remain less well known including landscape architect Ruth Shellhorn parade choreographer Miriam Nelson Aunt Jemima's Kitchen hostess Alyene Lewis and Tiny Kline who at age seventy one became the first Tinker Bell to fly over Disneyland This one of a kind book examines the lives and achievements of the women who made early Disneyland

Bigger Pictures for Innovation William B. Rouse,2023-02-07 This book comprises a set of stories about being an engineer for many decades and the lessons the author learned from research and practice These lessons focus on people and organizations often enabled by technology The settings range from airplanes power plants and communication networks to ecosystems that enable education healthcare and transportation All of these settings are laced with behavioral and social phenomena that need to be understood and influenced The author s work in these domains has often led to the question Well why does it work like that He invariably sought to understand the bigger picture to find the sources of requirements constraints norms and values He wanted to understand what could be changed albeit often with much effort to overcome resistance He found that higher levels of an ecosystem often provide the resources and dictate the constraints imposed on lower levels These prescriptions are not just commands They also reflect values and cultural norms Thus the answers to the question were not just technical and economic Often the answers reflected eons of social and political priorities The endeavors related in the book frequently involved addressing emerging realities rather than just the status quo This book is an ongoing discovery of these bigger pictures The stories and the lessons related in this book provide useful perspectives on change The understanding of people and organizations that emerges from these lessons can help to enable transformative change Fundamental change is an intensely human centric endeavor not just for the people and organizations aspiring to change but also for the people helping them You will meet many of these people in this book as the stories unfold The genesis of this book originated in a decision made early in the author s career He had developed a habit of asking at the end of each day What did I really accomplish today This was sometimes frustrating as he was not sure the day had yielded any significant

accomplishments One day it dawned on him that this was the wrong question He needed to ask What did I learn today It is always possible to learn most recently about public health and climate change In planning this book the author first thought in terms of accomplishments such as projects conducted systems built and articles and books published He could not imagine this being interesting to readers Then it struck him It is much more interesting to report on what he learned about people and organizations including how he helped them accomplish their goals This is a book of stories about how these lessons emerged In planning this book the author first thought in terms of accomplishments such as projects conducted systems built and articles and books published He could not imagine this being interesting to readers Then it struck him It is much more interesting to report on what he learned about people and organizations including how he helped them accomplish their goals This is a book of stories about how these lessons emerged
