AI Aesthetics Jan-Noël Thon, Lukas R.A. Wilde, 2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged Considering its decidedly international and interdisciplinary scope AI Aesthetics AI Generated Images between Artistics and Aisthetics will appeal to scholars and students within media studies cultural studies literary studies philosophy art history visual culture

Copyright and Anonymity in the Creative User-Generated World Rachel Maguire, 2025-05-01 This book explores the relationship between copyright law, online anonymity, and creative user-generated content (CUGC). Presenting original empirical findings, the book evaluates the co-existence of copyright law and normative systems regulating a CUGC landscape made up of artists, photographers, and writers, and makes novel recommendations for copyright reform. It takes a multi-jurisdictional approach across Anglo-American and EU legal systems, using the UK, USA, and Germany as representative jurisdictions for legal analysis. Qualitative findings are drawn from creators and communities on Reddit and 4chan. Copyright subsists in much CUGC, but pervasive anonymity makes it difficult for the law to regulate it effectively. Simultaneously, anonymity offers creative benefits in a way that highlights flaws in traditional justifications of copyright. Comparisons between community norms and copyright law identify practical differences but also fundamental compatibilities in terms of ownership expectations. However, the simultaneous existence of legal and normative enforcement mechanisms complicates matters for creators and potential users, with negative implications for creativity and copyright law. While existing reform efforts have made suggestions to create a UGC exception, these overlook and undermine the role of CUGC creators as copyright holders. This can be addressed through the consideration of a framework of supplementary CUGC guidelines when developing such reforms. This valuable resource for researchers and students provides a distinct perspective in framing CUGC creators as copyright holders, examining online anonymity as a pivotal factor influencing regulation.

Making Art With Generative AI Tools Hai-Jew, Shalin, 2024-04-01 In the dynamic realm of generative artificial intelligence (AI), the fusion of human creativity and machine intelligence has created a vibrant ecosystem of collaborative artmaking. However, this transformative process brings forth a myriad of concerns, ranging from ethical considerations and the need for originality to navigating the legal complexities surrounding intellectual property. As more and more online communities appear around the use of AI to aid in the creation of images, there arises a pressing need for a comprehensive guide that not only dissects the intricacies of artmaking with generative AI tools but also offers practical solutions to the evolving dilemmas faced by artists, researchers, and technologists. *Making Art With Generative AI Tools* emerges as an exploration of the challenges posed by this intersection of human expression and artificial intelligence. Artists engaging with generative AI find themselves grappling with issues of authenticity, social toxicity, and the commercial viability of their creations. From avoiding stereotypical visuals to ensuring proper crediting, the realm of generative AI is rife with these complexities. Furthermore, the blurred lines between human and machine authorship necessitate a deeper exploration of how these innovative tools impact creativity, representation, and the very fabric of the art world.
