Cybersemiotics Soren Brier, 2008-05-10 A growing field of inquiry biosemiotics is a theory of cognition and communication that unites the living and the cultural world What is missing from this theory however is the unification of the information and computational realms of the non living natural and technical world Cybersemiotics provides such a framework By integrating cybernetic information theory into the unique semiotic framework of C S Peirce S ren Brier attempts to find a unified conceptual framework that encompasses the complex area of information cognition and communication science This integration is performed through Niklas Luhmann s autopoietic systems theory of social communication The link between cybernetics and semiotics is further an ethological and evolutionary theory of embodiment combined with Lakoff and Johnson s philosophy in the flesh This demands the development of a transdisciplinary philosophy

of knowledge as much common sense as it is cultured in the humanities and the sciences Such an epistemological and ontological framework is also developed in this volume Cybersemiotics not only builds a bridge between science and culture it provides a framework that encompasses them both The cybersemiotic framework offers a platform for a new level of global dialogue between knowledge systems including a view of science that does not compete with religion but offers the possibility for mutual and fruitful exchange
