building resilient transparent and responsive systems Tackling this issue requires collaboration among businesses governments and the public to improve media literacy promote transparency and develop effective countermeasures Mass Media and Impact of Fake News on Supply Chains reviews major connections between mass media fake news effects and implications for supply chains It examines the impact of mass media on supply chain stakeholders the businesses and their suppliers the government and the customers Covering topics such as artificial intelligence AI global inflation and traditional media this book is an excellent resource for researchers professionals academicians students business leaders media and communications experts and more Languages and Compilers for Parallel Computing Henry Dietz,2025-10-31 This volume LNCS 14480 constitutes the refereed proceedings of the International Workshop LCPC 2023 in Lexington KY USA held during October 2023 The 10 full papers presented together with 3 short papers were carefully reviewed and selected from 14 submissions The conference focuses on mobile computing to big data and training of AI systems **GPU Parallel Program Development Using CUDA** Tolga Soyata,2018-01-19 GPU Parallel Program Development using CUDA teaches GPU programming by showing the differences among different families of GPUs This approach prepares the reader for the next generation and future generations of GPUs The book emphasizes concepts that will remain relevant for a long time rather than concepts that are platform specific At the same time the book also provides platform dependent explanations that are as valuable as generalized GPU concepts The book consists of three separate parts it starts by explaining parallelism using CPU multi threading in Part I A few simple programs are used to demonstrate the concept of dividing a large task into multiple parallel sub tasks and mapping them to CPU threads Multiple ways of parallelizing the same task are analyzed and their pros cons are studied in terms of both core and memory operation Part II of the book introduces GPU massive parallelism The same programs are parallelized on multiple Nvidia GPU platforms and the same performance analysis is repeated Because the core and memory structures of CPUs and GPUs are different the results differ in interesting ways The end goal is to make programmers aware of all the good ideas as well as the bad ideas so readers can apply the good ideas and avoid the bad ideas in their own programs Part III of the book provides pointer for readers who want to expand their horizons It provides a brief introduction to popular CUDA libraries such as cuBLAS cuFFT NPP and Thrust the OpenCL programming language an overview of GPU programming using other programming languages and API libraries such as Python OpenCV OpenGL and Apple s Swift and Metal and the deep learning library cuDNN *OpenMP: Advanced Task-Based, Device and Compiler Programming* Simon McIntosh-Smith,Michael Klemm,Bronis R. de Supinski,Tom Deakin,Jannis Klinkenberg,2023-08-30 This book constitutes the proceedings of the 19th International Workshop on OpenMP IWOMP 2023 held in Bristol UK during September 13 15 2023 The 15 full papers presented in this book were carefully reviewed and selected from 20 submissions The papers are divided into the following topical sections OpenMP and AI Tasking Extensions OpenMP Offload Experiences Beyond Explicit GPU Support and OpenMP Infrastructure and Evaluation Practical Deep Learning for Cloud, Mobile, and
