Synthetic Cinema Wheeler Winston Dixon,2019-02-05 In this book Wheeler Winston Dixon argues that 21st century mainstream filmmaking is increasingly and troublingly dominated by synthetic cinema He details how movies over the last two decades have fundamentally abandoned traditional filmmaking values through the overwhelming use of computer generated imagery digital touch ups for the actors and extensive use of green screen technology that replace sets and location shooting Combined with the shift to digital cinematography as well as the rise of comic book and franchise cinema the temptation to augment movies with lavish computer generated spectacle has proven irresistible to both directors and audiences to the point that Dixon argues 21st century commercial cinema is so far
