behaviors through an exploration of the themes used in this type of advertising. These thematic messages include using food to rebel, to play, to relax, to achieve happiness, to replace exercise, to achieve good health, to increase intelligence, to show love, to bond with others, and to create environmental change. Ultimately, Danowski argues that these competing and contradictory messages have had long-term negative ramifications for American habits of consumption, both literally and figuratively. Scholars of communication, advertising, media studies, and food studies will find this book particularly useful.
